➡ We are pleased to again feature the new **FIT 915** device from **Medical Electronics** in Germany. You've heard us talking about the **UBS 315** compact device for revitalizing water and other liquids. Follow the link here for more details on the **UBS 315** and contact OIRF offices for pricing, order and delivery details.

The **FIT 915** utilizes the same technology as the **UBS 315** however it is now fitted into an exclusively designed head piece that fits over the eyes. Studies and research are showing amazing results and effectiveness of therapies using the

correct light at the right time in the correct spectrum range. The premise of the FIT 915 is that the use of modern LED full spectrum light sources can offer us the same benefits as direct sunlight. The incorporation of white and red light in the FIT 915 fulfills all requirements which our organism needs for natural light.

There's already a preliminary list of very impressive indications for the **FIT 915** and it can also be used for "Super learning", hypnosis, sleep disorders and NLP when the photon radiation is modulated via the USB connection.

You can see a brief description on Pages 14 and 15 of this Issue. Please follow this link for full product information about the [FIT 915](#) written by Dieter Jossner (of biophoton fame!). Then contact OIRF offices for full pricing, order and delivery information.

 I invite all of you to maintain your email or print subscription to "The Bridge" newsletter. All 2017 issues of "The Bridge" will be sent to you by email and then published on our website. **Access is open to all.** Follow this link to get your PDF print copy of "The Bridge" Volume 13, Issue #4.

## **Fusion Light Technology**

By Catharina Jansma

### **History of Light Therapy**

#### **Light, color and crystals in 3,000 BC . . .**

The medical benefits of the light and energy of the sun, color and crystals were first recognized several thousands of years ago. Doctors and natural healers from almost every major culture around the world have used precious and semi-precious gemstones within their healing modalities. In Egypt, Greece, China, India, Persia they were highly valued in the medical field. The Mayans, Incas, Tibetans, North American Indians, Daoist Chinese and East Indian Ayurvedics are all recorded as having used them.

Even today these ancient cultures are revered for their wisdom, spirituality, understanding of the constellations, navigational abilities, architecture and objects of beauty – qualities that even with our modern scientific techniques we cannot replicate.

*It seems only fair to assume that such great cultures would only use light-activated gemstones for thousands of years if they brought the benefit of deep healing?*

#### **Natural, crystalline energy**

As gifts of nature, crystals serve as a storing agent for electro-magnetic energy, and their powerful rays of color determine the frequency of the energy that they emit. This can penetrate beneath the skin affecting the cells of the body.

Traditionally the patient would be laid on the ground outside. The hand-mined stones would be laid upon the patient's body, usually at midday with the sun at its highest point, and the sunlight allowed to filter through. The color, light and crystalline energy would be directed deep into the tissues, organs and meridians of the body, stimulating healing to take place. The ancients understood that the fusion of electromagnetic earth energy, together with light activation of the gemstones, was crucial in achieving the positive healing potential held within the gems.

Although scientific factors, such as the production of vitamin D in the body and the activation of ingested calcium were not at that time understood, the overall benefits were appreciated and proceeded to be used by later cultures such as the Romans.

### **19th century developments**

In the 19th century a succession of doctors used 'new' technology to explore wavelengths further. They used previously unknown rays of light and color, such as ultraviolet, to heal diseases in the fields of dermatology, neurology and physiotherapy.

The Danish physician *Niels Ryberg Finsen* founded modern light therapy over 100 years ago. In 1903 he was awarded with the Nobel Prize in medicine for his achievements with light therapy. Finsen created the first device to generate technically synthesized sunlight and achieved outstanding results in the treatment of patients suffering from a special type of skin tuberculosis. Theragem™ uses incoherent polychromatic LED's running at 480-780nm, considered by leading medical research centers as possibly the best healing light source on the planet for creating deep lasting cellular change. However with Theragem, light is of only part of its multi-modality Fusion technology.

### **Fusion technology – blending it all together**

Therapies of light, crystalline energy and color work by positively affecting the electromagnetic state in the human energy system. It is understood today that, for any chemical action to take place within that system, a change in the electromagnetic energy of the body must occur first.

In developing the Theragem, Medica Health International has combined these important fusion elements to offer the finest light-activated gem device on the planet today.

### **Light Therapy in Modern Times**

Today, we have not only proven that sunlight helps the body to produce vitamin D and absorb calcium, but also that it regulates our body clock. This is responsible for body rhythms such as heart rate and blood pressure, sleep, mood, menstrual cycles and energy levels. Skin conditions such as acne, eczema and psoriasis benefit from sunlight, and it can prevent heart disease, lower cholesterol levels, build strong bones and teeth and defeat depression. In addition, NASA uses light therapy to counteract the weightless environment in their astronauts.

A variety of light therapies have been developed to harness the rays of light and color to correct imbalances, improve health and restore vitality. Ultraviolet light therapy, colored light therapy, photodynamic therapy, photo medicine and photomodulation are amongst those used to address physical, mental and emotional complaints.

**Modern day uses of light therapy:**

- Seasonal affective disorder (SAD) – also known as the winter blues, cabin fever or mal-illumination syndrome – is a direct result of insufficient sunlight. Light therapy has been used for all kinds of non-seasonal depression and bipolar depression.
- Light therapy is a well known method of treating new-born babies with jaundice.
- It can stimulate increased circulation and collagen production in skin tissue.
- Since cellular growth depends upon gravity, NASA use light therapy on astronauts to counteract the weightless environment

**Introducing Medica Health's Theragem Fusion Light Therapy**

The face of medicine is transforming. Some doctors believe that sound and light frequency will be the medicine of the future. As scientists continue to embark on new understandings in the field of quantum physics, researchers around the world are exploring the therapeutic uses of light in all its guises, called variously laser therapy, low-level light therapy, color therapy, photodynamic therapy, photo medicine or photo modulation. One of the most exciting areas of medical research and treatment is light therapy, especially low-level light therapy.

**Theragem™**, manufactured by **Medica Health International** in England and distributed worldwide by various sales agents, is a range of products that includes a medical-grade therapy device that has applications for a range of conditions. The LED low-level light therapy used by Theragem is registered by the U.S. FDA 510K medical device as being a gentle, painless, safe and effective therapy.

Based on ancient scriptures Theragem's excellence is created with fusion of light therapy, precious and semi-precious gems, metals, color, white noise, Schuman resonance and Pulsed Electromagnetic Field technology; optimally enhancing many conditions and disorders.

Theragem technology is a low-powered, non-coherent, polychromatic assemblage with specific pulsed electromagnetic fields (EMF). By focusing the wavelengths and targeting the light, practitioners are able to cause photo stimulation in cells, glands, organs and tissue, whereby a chain of chemical responses is triggered in the targeted area. The theory is that cells and tissues are stimulated to emit enzymes that encourage photons (light energy) to be more readily transmitted to the cell photo receptors, increasing cell activation and spurring the body's self-healing capacities.

Theragem Fusion Light Therapy helps the physical body achieve harmonized balance, easing the mind into a relaxed Theta state and energizing the spleen to clear and filter the blood, and to boost white blood cell production.

Theragem Fusion Light Therapy has shown effective and repeatable positive successful results on hundreds of conditions, on pain, the skin, nerves, organs and bones, short and long term degenerative conditions, ailments and aches, towards achieving optimum homeostasis.

Non-invasive, completely pain-free and relaxing therapy with 99.9% positive results at the 1st treatment, it is the ultimate therapeutic tool. Theragem can be applied as a standalone therapy as well as together with other modalities. In 20 minutes time this energetic fusion of old and new technologies can:

- Boost the immune system
- Increase vascularity, which speeds the healing process.
- Opens up the fastest way to optimum health & wellbeing
- It is the easiest way to the Assemblage Point Reconnection
- Easily integrates in existing treatment modalities
- Stimulate the production of collagen, which is a cellular repair substance.
- Stimulate tissue projections and tissue granulation for healing of ulcers and wounds and for reducing inflammatory conditions.
- Stimulate lymphatic drainage
- Supply energy to stimulate RNA and DNA, and to stimulate ATP, the "energy molecule" for cells that allows them to do "work."

Within 20 minute sessions people can relax and boost their immune system with sparkling eyes and improvement on their total wellbeing and energy on all levels. Visible and undeniable in test methods such as Heart Rate Variability, thermal imaging, x-ray, poly contrast interference photography, and physical, emotional, mental and spiritual levels.

Seen as the missing link to help gain a consistent concentrated therapy on a high level, alongside a healthy lifestyle for therapists and clients, it is able to correct the Assemblage Point, treating root cause of dis-ease as well as the symptom(s). Theragem's unique information input has shown to be enhancing the quality of (cancer) patient's lives, dissolving pain, physical discomforts, ensuring improved living and re motivating. The crucial part of Theragem is to be the structural provider of energy to build up the immune system thus allowing systematic positive change on its own and in conjunction with other modalities.

The **Theragem™** range of products includes the futuristic, cutting edge Theragem™ **T1005 Clinique** with front touch screen and back screen, adjustable time and intensity settings and optional software (Multi frequency generator, BBL and Eternity) are available in three different configurations. The Theragem™ **U1003 Eternity** has been designed for wellbeing, beauty and spas, with the Theragem™ **Encoder** to further bringing the highest quality into aroma therapy oils, creams and liquids.

To enhance the therapy over 45 different blends of precious gems and crystals have been carefully selected on their purity and carat mixed for ease of use in therapy settings in clickable gem cups fitting for all the systems.

For personal use we also have an innovative handheld **LadyGem & TigerGem** units and the **SunRise SunSet** mattress with PEMF for deep restful nights and bright energetic mornings. For more information our website [www.medicahhealth.org](http://www.medicahhealth.org)

Medica Health International Ltd creates, manufactures, sources and introduces cutting edge wellness products and medical equipment, our leading range being Theragem Fusion Light Therapy. The key to optimum homeostasis is fusing ancient wisdom with present day science to produce a unique therapeutic modality preparing the biological terrain on the physical, emotional, mental and spiritual level, treating symptoms and root cause.

**Carolyn's Comments:** In recent years we have watched some of our top rank Naturopaths going back to the books to prepare for the dreaded "prescribing exam". Personally I wonder about why our NDs are being trained and examined to prescribe (allopathic) medications when as Naturopaths they would normally "prescribe" homeopathics, supplements, herbs, etc. On the other side of the coin we are seeing our homeopathics and natural remedies being taken off the market by Health Canada and the US FDA. Where can we now turn for remedies for our patients? Note that Sanum, Heel and other North American "discontinued" remedy companies are definitely licensed and included in the software above . . .

## **The FIT 915 from Medical Electronics**

### **Light: Scientific research results confirm the importance of correct light conditions**

#### **Healthy with light**

The correct light at the right time; this leads to an outstanding potential of until now unused possibilities in energetic regeneration. Discoveries in the areas of photo-biology and chrono-biology reveal new and easy to use technologies within a wide ranging spectrum with effective application of light in a bio-energetic therapy.

**Light:** a phenomenon which has occupied human beings since ancient times. It is only now that we understand the enormity of the biological processes which are connected to this energy but which are still not fully understood. Only slowly is natural science recognizing how extremely important the interaction between biological processes in our bodies and the existence of the correct amount of light together with the correct spectrum range at the right time. In nature nearly all biological processes are synchronized by the light-dark phases of the natural sunlight.

#### **White light, an important contributor to our health**

##### **Healthy and fit with correct light**

Is it possible to be put into a good mood and feel fit by pressing a button? Most probably! Our mood and health are primarily controlled by hormones. These hormones are mainly controlled by light which we absorb with our eyes. This knowledge opens up untold new possibilities to positively influence the body. New technology is making this possible now.

Astonishing results based on the study of light are gaining more and more importance. The natural science branch involved in researching this field is called chronobiology. Practical understanding in this field teaches us about the significance of the correct light at the right time. Important hormones for our health and well being are endorphins, dopamine and serotonin which are controlled by light. Their existence is the immediate reaction to the absorption of natural light or light with equal physical properties. The intensity and the spectrum play an important role. A specially important part of the daylight spectrum is the large proportion of blue light (450-480 nm).

#### **Red light regenerates and repairs holistically**

##### **Optimal wave length for holistic regeneration of all eye functions.**

Scientific studies confirm that red light with a wave length of 630 nm offers maximum benefits for tissue regeneration. This wave length is also preferably used in photobiology to stimulate holistic body healing effects. Maximum depth penetration and optimal absorption guarantees the best possible treatment results, even in deeper skin tissue. This ensures that the eye itself and all linked supply systems are benefitting from the healing energy of the photons.

#### **The brain needs the information provided by light to be able to cope with the numerous tasks**

The light absorbed by our eyes is used by the brain for various tasks. Only about 15% of the light which the eyes absorb is used for orientation purposes. The remaining 85% are used in various parts of the brain. Circulation, metabolism, blood pressure, hormones and a whole range of other important functions are directly or indirectly dependent on the light absorbed by the eyes.

**Sunlight is variable and continually changes its brightness and color combination**

Starting at sunrise and through to sunset the sunlight spectrum arriving on the earth's surface is constantly changing. Since the beginning of time this dynamic light has nurtured all life on this earth. All living organisms have adjusted to this natural biologic rhythm and accepted it as the pacemaker for their inner life rhythm. Accordingly the hormone production is adjusted to the relevant time in the day because of the dynamic of light. Control of the complete hormonal balance can be lost if this dynamic is missing (night work/shift work).

**Artificial light sources create biologically unfavorable light**

Living areas and work places which are illuminated by artificial light sources induce a raft of problems of the inner synchronization to the outside world. Important wave lengths are missing in this light and it has a permanent unnatural color combination and brightness. The light flickers with toxic frequencies and transfers by plasma discharges of mercury gas corresponding spectral information via the eyes to our brain. Over time this can have disastrous consequences for our health.

**Modern Technology offers a solution**

Due to new developments in producing light we now have light sources (LED) with extreme brightness and an ideal spectrum at our disposal. With the modern high intensity LEDs it is now possible to produce light which is utilized by our organism like natural sunlight. The development of the light unit **FIT 915** fulfils all requirements which our organism needs from natural light.

The solution is the **FIT 915**

**Intensive white radiation 9,000-14,000 lux wavelength 400-700 nm**

**Intensive red light radiation 12,000-20,000 mc (12,000-20,000 lux) wavelength 630 nm**

	<p><b>UBS 315 with the Tesla transfer module</b> (This part shown with the <b>UBS 315</b> unit <b>is not part of the basic supply</b> – added optional accessory) The transfer module is available for transferring bio energetic signals from the UBS 315 unit to the irradiated liquid. The module consists of a transfer area with two Tesla coils and holders for maximum four vials. The transfer of the bio signals is achieved by active scalar fields which are emitted from the UBS 315 unit. Included in the delivery are five suitably sized vials. <b>PRICE:</b> US \$310 / CDN \$400 (plus shipping)</p>
	<p><b>UBS 315 with sensor for NSA 07</b> (This part shown with the <b>UBS 315</b> unit <b>is not part of the basic supply</b> – added optional accessory) This transfer module is used to transfer signals generated by the NSA 07 unit. The module consists of a sensor for those signals which are emitted by the NSA 07 unit. These are then changed into audio signals enabling the modulation of the UBS 315 unit. Large volumes (a whole room) can therefore be energetically created with the frequency spectrum produced by the NSA 07 unit. <b>PRICE:</b> US \$335 / CDN \$435 (plus shipping)</p>

### OIRF Special Reports:

- 1) **Report on LM Potencies** (Homeopathy). Translated and prepared by **Dr. Walter D. Sturm** based on the work of **Dr. Samuel Hahnemann**. This is pivotal information for all homeopaths. In the last years of his life Dr. Hahnemann turned solely to the use of LM potencies for his patients instead of the "usual" C and X potencies still utilized today. This knowledge was suppressed for nearly 80 years and revolutionized the practice of homeopathy when that famous 6th edition of his Organon of Medicine was finally published. Read the story and see the meticulous research and translation left us by Dr. Sturm. See further information on this important report at this link. 51 Pages. \$40
- 2) Collection of **Three Reports by Dr. Gottfried Cornelissen** (BioResonance). 1) A Critical Examination of Current EAV Diagnosis (individual report below); 2) Increasing Efficiency of Allergy Cancellation Therapy by Application of Substance Specific Frequency Ranges; and, 3) The Problem of A and Inverted A in Homeopathic Nosodes (individual report below). 31 Pages. \$20

## A Special Report

# The Ground Regulation System (GRS)

By o. Univ.Prof. Dr.rer.nat. med.habil. Hartmut Heine †

A few years after his serious illness in 2011 **Prof. Dr. Hartmut Heine** published a series of seven articles on the **Ground Regulation System**. I [*Carolyn Winsor*] was honored to be able to translate this incredible research into English for the first time and to publish it in our newsletter, "The Bridge".

As I worked my way through translation of the first article, the wealth of knowledge and understanding imparted in even that introductory article left me scrambling for dictionaries, research documents hidden away in the old OIRF library and way beyond "Google searches" to make sure that I was doing justice to the information Prof. Dr. Heine was imparting. Combined with the succeeding six further articles, his gift to us of knowledge and of understanding is truly priceless.

In respect for Prof. Heine I have merged those seven articles into one single report and have republished it separate from that older newsletter. With a total of 48 (mind-blowing) pages, this work is not just "worthwhile" reading, but mandatory reading for all practitioners of orthodox and complementary medicine. Available in electronic or print format for \$30, here is an outline of the contents:

- Part 1** – The Ground Regulation [A History and Background]
- Part 2** – GRS as a non-linear system – Structure, function and determined chaos
- Part 3** – GRS as a non-linear system– Structural components of the extracellular matrix (ECM)
- Part 4** – Spatial structure of the ECM and material transport within the system
- Part 5** – Contact, limitation and clogging up: Cell adhesion, basal membrane and glycosylation
- Part 6** – Functional relations of the ground regulation with the central nervous system
- Part 7** – The Ground Regulation and the Circadian Rhythm
  - The Ground Regulation and Alzheimer Dementia

### **"EXTENSION TRAINING" PROGRAM IN MODERN & TRADITIONAL ACUPUNCTURE**

Over twelve hundred pages of printed materials incorporating applicable materials from the supplementary textbook ([An Outline of Chinese Acupuncture](#)) and set of four charts (by [China Cultural Corp.](#)). Program starts off assuming you know nothing about acupuncture (a good place to start even if only as a thorough review of the basics) and takes you right through to the most heavy-duty advanced aspects of true, 'energetical' acupuncture. The finest and most comprehensive material in the English language, covers all seventy-one meridians of traditional acupuncture; that 'missing sixty percent' of acupuncture knowledge most "acupuncturists" have never even heard of; and, the modern electronic 'needle-less' treatment methods (Electro-Acupoint Therapy) now so popular.

Over 3,000 students were originally enrolled in this famous Extension Training Program, and the OICS graduate listings read like a "Who's Who of Acupuncture" in the English speaking world. This program takes you as far as anyone possibly can in a 'written' format prior to the clinical finesse and practicum needed to round out your acupuncture study to professional levels.

#### **FULL THIRTY-THREE LESSON PROGRAM NOW AVAILABLE ON DVD**

**Price includes** disc with all 33 Lessons, applicable supplementary textbook (An Outline of Chinese Acupuncture) passages and representation of set of acupuncture charts (China Cultural Corporation set of four). [Current editions of the textbook and charts can be easily obtained from suppliers of acupuncture books and supplies.] Price does **not** include printed materials, binders; or, any tutorial, examination, or certification privileges. Follow above link for full details. **Full set on one disc available for CDN \$165.**

➤ **Acupuncture Meridian Assessment Training** for MD, DO and DDS. Primary focus is teaching medical practitioners how to check the essential acupuncture points to look for disturbances which might be an indication of parasites or dental problems. This training covers many clinical case histories that will amaze you with the healing results that occur where prior numerous doctors and specialists failed to succeed. Class consists of lectures and lots of hands on "boot camp" drills for 2½ days held in St. Louis, Missouri **June 23-25, 2017**. Sponsored by **Dr. Simon Yu** and also featuring **Dr. Robert Cass, Dr. Doug Cook, Gordon Johnston** and **Carolyn Winsor**. To register contact Kate, Office Manager at 314-432-7802 or [Prevention and Healing](#)

This always exceptional and highly recommended conference will take place in **St. Louis, Missouri on Sept. 29, 30 and Oct. 1, 2017**. You can find all the registration and conference details on their website at [www.iamconf.com/](http://www.iamconf.com/) OIRF will be there! Plan even now to attend and get your registration in today.

➤ **Mayr Therapy:** This is a method that has been recommended by OIRF for many years. We have sponsored at least six official English language Mayr training programs in the past that featured the direct students of **Dr. F. X. Mayr**, including **Dr. Erich Rauch** and **Dr. Ernst Kojer**. In Austria this training was offered solely to MD's, but with the passing of many of the original practitioner/teachers those requirements have been somewhat relaxed. It was interesting to see both the two main Mayr organizations well represented at the Medicine Week Congress. Both organizations have been offering English language training and it is my pleasure to re-introduce this method to our members and supporters. Even though there are no commercial or financial ties between OIRF (and none of our Advisor/Directors are directly involved) and these Mayr organizations, we felt it important to continue our recommendation for this well proven and highly effective method.

This year the **VivaMayr** organization in **Maria Wörth, Austria** (oh, such a beautiful area!) is offering two programs in English which feature **Harald Stossier, MD**. Contact Kristen by email at [kristen@viva-mayr.com](mailto:kristen@viva-mayr.com) for details and registration information. Courses available in Maria Wörth are:

- ~~Basic Intensive Course, I & II: Jan. 15-27, 2017~~ – COMPLETED.
- **Advanced Training II: July 23 to Aug. 4, 2017**

➤ **51st Medicine Week Congress.** Dates are **Oct. 28 through Nov. 1, 2017** in Baden-Baden, Germany with OIRF Advisors, Directors and Germany Tour participants attending. Usually more than 3,000 doctors participate with nearly 200 lectures, workshops and courses (German and English language). Exhibit area with more than 220 exhibits provides you with an excellent insight into the big product offerings in natural healing and complementary medicine. There you can find out directly, and compare. Contact OIRF for attendance possibilities.

➤ **Biological Medicine Tour #44 to Germany, October 26 through November 1, 2017.** Join us for our **44th** group tour including the world famous "Medicine Week" Congress in Baden-Baden. Tour program also includes exclusive OIRF English language lectures from renowned German clinicians and researchers as well as pharmacy and clinic visits. Speaker, event, itinerary and registration details are posted on our website.

Carolyn has translated many of them for inclusion in future newsletter issues. We are looking forward to introducing some of the new devices (a newer model of the RM10 diagnostic device) and methods that were seen in Germany during the recent tour. The May Issue will feature an article by our newest Medical Advisor **Dr. Robert Cass** of the **Academy of International BioEnergetic Sciences**.
