

THE BRIDGE

Linking Practitioners of German Biological Medicine

Volume 11, Issue #12, December 2015

Monday, 21 December 2015

Dear Colleagues, Friends and Supporters of OIRF,

👉 **Welcome to Volume 11, Issue #12 – the final Issue of “The Bridge” newsletter for 2015!**

As we approach the end of another year and another Volume of this newsletter, it has been interesting to not only look back at what has been accomplished but also to look into the future and our many plans for the coming year. Already plans are underway for the **43rd Biological Medicine Tour to Germany** and several speakers are already confirmed. Plans and registrations for OIRF to be present at a number of important conferences throughout the US and Canada are already in place, and we are looking forward to an exciting and busy year. It is our hope that you will join us in our efforts to expand the use and knowledge of Biological Medicine in Canada, the USA and around the English speaking world.

👉 I found the following article from **PaedDr Uwe Uellendahl, HP** to be both fascinating and challenging. His analogies and descriptions of BioResonance Therapy are exceptionally insightful, and I know are going to be very helpful in explaining this therapy to our patients. He is a member of the elite OIRF Board of Advisors, and I offer the Institute’s thanks to him for this contribution to our newsletter. Dr. Uellendahl is introducing us to a new device called the **Kindling EASY**. Although not an OIRF recommended device, MORA and BioResonance therapists will find the information and method of great interest.

Numerous new and cutting edge articles from our prestigious Board of Advisors as well as Carolyn’s translations of articles from current German journals are underway for Volume #12 issues of this newsletter, and I invite all of you to maintain your email or print subscription to “The Bridge” newsletter. All 2015 issues of “The Bridge” were sent to you by email and then published on our website. This will continue into 2016 with the new Volume 12 Issues. **Access is open to all.** Follow this link to get your PDF print copy of “The Bridge” Volume 11, Issue #12.

➡ Carolyn has just returned from the **A4M Annual Conference** in Las Vegas (held Dec. 9-13, 2015). As we prepare to participate in these huge conferences, the Managing Director, **Mr. Karsten Unger** and their Marketing and Sales Manager, **Ms. Sandra Börsig** from **Med-Tronik** Germany joined Carolyn for several days. With registration of the MORA® Beauty in the USA, we will be focusing on the cosmetic and wellness applications of this new device as we re-introduce MORA and BioResonance to the USA and Canada. We will look forward to meeting you at the 2016 Conference.

As Carolyn met and talked with a number of difference companies and individuals during her visit this year, it was a real pleasure to meet (again) a number of current and previous OIRF members. It was an opportunity to renew contact with our "partner" companies like **Dr. Silvia and Rolf Binder** from **Ondamed** and to open new discussions with a number of others who will be introduced over the coming months.

Note that full OIRF recommendation has already been granted to **AlfaThermodiagnostics** and the **UVLrx** instrumentation. More information will follow early in the New Year.

All of this exciting news combined with our rapidly expanding seminar, workshop and conference schedule forecasts an exciting, educational and innovative 2016 season. During the Holiday weeks, Carolyn will be working away at updating and upgrading the OIRF website to show these many changes and events.

➡ **Holiday Closures at OIRF:** "Officially" the offices will close in the afternoon of 23 December 2015 and will reopen on 04 January 2016 resuming our regular office hours of 8:30 AM to 4:30 PM Monday through Thursday and 8:00 AM to 12 Noon Friday. However, we will be monitoring our emails during the holidays – and if Elaine will allow it – Carolyn plans to do post-Germany and post-A4M catch up work (maybe from the work-linked computer at home?!). For a "crisis situation" please send us an email and we will phone you back as soon as possible. We wish all of you Merry Christmas and Happy Holidays!

➡ Here is a picture of the new MORA-Beauty specially designed for cosmetic applications. Four modules with software and appropriate accessories provide highly effective and delegable applications for: smoking cessation, relaxation, detoxification, stress relief, revitalization, cellulite and wrinkle reduction, weight loss, and optimization of nutrition. See more detailed information on this amazing device on our website at: www.oirf.com/inst-morabeauty.html

➡ Here are your newsletter items for this Issue #12 . . .

How to Treat with Long Lasting Success

Or: How do I get the Black Belt in BioResonance?

**By PaedDr. Uwe Uellendahl, HP
(OIRF Medical Advisor)**

**From an article in Kindling BioEnergetik, Sept. 2015
Machine Translation by SYSTRAN, Lernout & Hauspie, LogoMedia & Promt
Translation & redaction by: Carolyn L. Winsor, OIRF**

© Copyright 2014, Dr. Uwe Uellendahl, Neunkirchen-Seelscheid, Germany

Dear Colleagues, Ladies and Gentlemen,

Those in our profession are always trained and certified at the most up-to-date level of knowledge through regular advanced continuing education and are challenged anew to prove these qualifications over and over again in the everyday practice with patients. Now however the topic of "BioResonance" provides a great challenge to the user hungry for knowledge. All existing explanatory scientific models are just exactly that, what they are: Models! This means: We form an image of that which could be, admittedly a biologically plausible image, but just "only" an image with the character of a model. We do not know 100% exactly **how** BioResonance application functions, however we do know **that** it functions.

And thus we are already right in the middle of the discussion about the scientific materialistic-reductionist paradigm (→ everything can be explained and described from right into the smallest inside / the dominant university approach in today's school [*orthodox*] medicine) versus scientific empiricism (→ experiential medicine in the best sense is reproducible and learnable, often however in the absence of research the quintessence is not yet explainable in the sense of the materialistic-reductionist way of thought).

Michael Galle, DSc, HP, biologist and for me a very respected colleague, has described this and much more very well in his publications, and I strongly recommend these to every therapist who would like to use BioResonance.

Let us note: Year after year in the Fall if I see apples falling out of the tree onto the ground, then I do not necessarily have to be able to explain the materialistic-reductionist earth's gravitation in order to be able to accept (therapeutically) that also during the coming years in the Fall the apples will not climb into the Heavens, but rather according to experience (empirical-experiential medicine) will fall onto the ground. But of course everybody longs for the day in which we finally find out for certain which electromagnetic oscillations in BioResonance Therapy can influence and control exactly which extra- and intracellular processes.

Against this background and apart from the research of *Fritz-Albert Popp* and *Bruce Lipton* already another landmark was laid for us “Frequency Therapists”: In 2012 a Nobel Prize for Chemistry was given to *Robert Lefkowitz* and *Brian Kobilka* from the USA. They investigated receptors in the body's cells which process external stimuli, possibly in the form of chemical compounds or light.

Thus here an exactly definable anatomical structure is claimed so that a specific function must exist. Marvelous!

Thus we continue waiting until whenever the next discoveries about the explainability of BioResonance reach us, and for now we turn to the scientific-medical empiricism of BioResonance.

The Most Important Therapeutic Element

Now what is the most important therapeutic element in BioResonance application? The so called “Knock Out Criterion” which in the meantime decides whether or – alternatively – not the treatment runs successfully? The reply to this question is simple and results from the name “BioResonance”: “Bios” is life and “Resonance” in our case here means electromagnetic communication.

So the effectiveness of BioResonance is decisively dependent on how precisely you succeed in exchanging therapeutically effective information (= electromagnetic oscillations) with the body of the patient through a “communicator” (= BioResonance device), which is then forwarded to the receptors of the cell membrane on the inside of the cell, where . . . well, we simply say . . . where they do good there.

We also know examples of specific BioResonance application from Mother Nature: Even if we only think of the frequency spectrum of sunlight and the resonance-conditioned tanning of the skin or Vitamin D formation.

Following these two models we should also be successful in offering effective(!) oscillations to the patients.

In my BioResonance seminars, I always lead with the words: “I am a *Heilpraktiker* not a *Heiltheoretiker* . . . however a bit of theory never hurts.” *

Therefore I must describe a little specific theory here, but I promise you high and holy it does not serve an end in itself or the need to complicate anything, but rather it should lead exclusively to the fact that the most lasting therapeutic result is secured with every application.

I would like to begin with the testimony that I deal with BioResonance exclusively in the classical sense. Simplistically said this means that our patients are directly connected by body electrodes and cables with a physically existent BioResonance device. Absolutely there are also other forms of frequency therapy which use the term “BioResonance”, but I simply do not talk about them in the following [article].

We designate the preceding example with the reactions of the body to sunlight as **exogenous BioResonance**. The patient is simply supplied with frequencies which originated outside the patient’s body and which cause a reaction. In the classical exogenous BioResonance application, a solid or liquid body material of the patient is supplied into the so called “Input Beaker” **. The name “Input Beaker” by the way derives from the fact that the electromagnetic oscillations of the inserted materials are measured and led into the BioResonance device. The more the inserted biomaterial corresponds to the pathology of the patient, the better the therapy result is.

In classical BioResonance Therapy the patient is in direct skin contact with the electrodes, and we designate this as **endogenous BioResonance**. Here direct electromagnetic potentials from the skin’s surface are measured, are led into the BioResonance device and from there are transmitted as therapy oscillations back through the cables and contact electrodes to the skin of the patients,

In a physical sense an oscillation exists as frequency and amplitude. Now you can easily imagine that we measure no single frequency from the skin of the patients, but rather very

* This is a “play on words”: Heilpraktiker in German is our Naturopath. Here, however he is saying that he is a natural healing practitioner rather than a natural healing theoretician! Good one, Uwe!

** Also called the input cup (electrode)

many so called frequency sums are transmitted. Here I agree with **Alexander Popp** (Quote: “*As of today it cannot yet be specifically determined which chemical reaction is released in the cell by which frequency. Hence for me it only makes sense to treat with an as wide as possible spectrum.*”) As long as we do not know just yet, exactly which metabolism processes in the human body can be controlled with which single frequency; we work with frequency sums which are empirically known to achieve the intended therapeutic effect.

As already suggested classical endogenous BioResonance therapy is operated through body electrodes. Standard are hand and/or foot electrodes, tape and rubber electrodes [*non-adhesive flexible electrodes*] as well as the adhesive electrodes from ECG diagnostics. The application of the electrodes to the body results according to anatomical conformity, but also according to other considerations, thus e.g. to meridian courses, Head’s zones, painful points, etc.

Therefore after the patient is connected to the BioResonance device with the body electrodes, and also the corresponding body materials (e.g. urine, saliva, blood, operation material, tears, skin chafing, etc.) are inserted into the Input Beaker, the BioResonance device should work. But how?

The devices have various electronic filters built-in in order to extract and to form the best possible electronically filtered and therapeutically effective electromagnetic oscillations from the patient’s presented oscillations. These are then led to the patient’s contact through the Output of the devices.

In the prevailing stages of further development of BioResonance devices, nearly all the manufacturers offer a more or less greater number of so called indications or fixed programs. To the greatest possible extent, these programs consist of preset frequency filters, frequency formation defaults, amplitude settings, etc. for the therapy oscillations. In most cases these programs are collected through positive experiences of many therapists with just those therapy settings on the device for specific indications.

Erich Rasche, with whom I was allowed at that time to learn my basics in BioResonance Therapy, always described this fixed program therapy as the so called “Buckshot Therapy” – therefore a few balls always hit; nevertheless the question is whether the [*target*] disc falls.

Obviously, the advantage of fixed program therapy is that the therapy in the device runs automatically, as soon as the indications are input and the programs started. Thus this form of application is also easily delegable from the physician or naturopath to “helping hands”.

However what must one do to get from “Buckshot Therapy” to “specific” BioResonance therapy?

BioResonance Therapist = Sound Director

For an easier understanding, I would like to call on your imagination and introduce you to an explanatory picture, exactly how I also try to explain it to my patients in my practice: A singer stands on the stage and sings into her cable microphone. The microphone leads the sung information further to the mixing desk of the sound director. With the result that only just at this mixing desk the sound director has fulfilled all the possibilities to electronically improve the electromagnetic oscillations of the voice of the singer. Then the electromagnetic oscillations released by the sound director are put to the output of the mixing desk and reach from there across the circuits to the loudspeakers (= the body electrodes) and the patient’s bodies can “listen” to the therapy frequencies, just like the concertgoer to the singer.

Of course the singer should be good, but if the voice is “ill” or no good acoustics prevail in the concert hall, then it just needs a perfectly trained sound engineer who ensures the bad (= pathological) transmission of the voice into the room.

Dear Reader, you notice that we are heading for the “K.O. Criteria” of an effective and lasting BioResonance Therapy: The optimal resonance between the singer and the concert public in the great concert hall of the human body, as well as the virtuoso use of the mixing desk by the sound director. The deficient “acoustics” in the body are well explained thanks to the teaching of *Pischinger* about the functional unity of the interstitial space and are proved anew in everyday practice over and over again: The stronger the over-acidification and oxidation of the interstitial spaces seems, the worse are the “acoustics”.

Sol- and Gel- status according to Pischinger

Imagine yourself in a concert hall which is filled with balls on which H+ appears, thus hydrogen – there the sound director must already turn up the volume really well, so that the song comes over the loudspeakers to the people. In this connection the sound quality will nevertheless be absolutely worse than in a “clear” concert hall transmitted to the body: in an environment in which the ground regulation according to Pischinger functions perfectly.

Therefore the central question about the topic of effective BioResonance Therapy can only be:
Which settings on the “mixing desk” (= BioResonance device) must be selected so that at every moment of the “concert” (= therapy session) the “listener” (= cell receptors for the electromagnetic oscillations) of the “Song” (= therapy oscillations) can reasonably hear, understand and transform?

In order to find these settings the sound director uses his hearing and his experience. However the BioResonance user needs a test procedure (Electro-Acupuncture According to Voll [EAV] or related procedure or as the case may be Kinesiology or Biotensor) in order to measure out the relevant parameters in the patient and to individualize the therapy program. From the “Buckshot Therapy” comes a specific BioResonance application.

The Black Belt of BioResonance

No Question: He who masters these techniques, or at least one of them and can reliably apply them to the patient and to the device, has the Black Belt in BioResonance Therapy and with a reliability bordering on probability also a whole lot of contented patients and accompanied with that an economically well off practice structure.

On the other hand in a figurative sense this means, through various advanced trainings which are device specific offered mostly by the device manufacturers in the BioResonance scene, that you can bring the sound director to the mixing desk in order to be able to individually set the BioResonance device optimally for each patient.

No pain no gain, may we now imagine the one or the other – and this is also correct of course!

Now if suitable seminars are attended, the necessary practice is made and a reassuring routine in measurement procedures has appeared, then he can start off on patients in the practice.

The patient is examined, measured, the parameters of the therapy programs are set and then these are started. Such programs usually run a few minutes, but can however also (one calls them “chain” programs) last from 20 to 30 minutes. According to the version of the respective “BioResonance School” (device manufacturer), at which one feels in good hands. Within these run times of the individualized therapy programs the set values remain constant. You could also say: That the program just remains “monotonous” after its individualization, nothing more changes until the end of the program is reached.

Basically, every classical BioResonance Therapy is an individual therapy, because it works with the body’s own frequencies. When *Paul Small* is connected he is treated with his own electromagnetic oscillations and not with those from *Lisa Miller* from the therapy session before [*Provided – of course! – that the contact electrodes are changed or cleaned every time between patients! CLW*].

But then who says that the parameters set at the beginning after a certain therapy time are still what the body needs to go into resonance and with that into regulation?

For this please imagine yourself once in a seminar, which you want to, or have to, listen to over a long period of time. The lecturer always speaks to you on and on evenly without any change in his vocal situation or vocal color . . . sometimes even the most inclined listener is no longer completely with the subject.

This means: The longer a fixed program with preset, or nevertheless also individualized parameters runs, the greater becomes the probability that the relationship of the offered parameters and actually required parameters breaks apart more and more like scissors.

Then the solution must be:

- a) Therapy program sequences must be relatively short, and
- b) Each new sequence must be measured anew in the patient with regard to the necessary parameters, and
- c) The respective new measurements represent the program parameters for calibration, and at the same time also represent a result value with which the effect on the patient of the preceding BioResonance application can be described and explained

This is quite surely and certainly the Black Belt in classical BioResonance Therapy. I have also worked with the patients in such a manner myself over the years on my own BioResonance device and have brought colleagues into the subject. Then with this practice in my seminars I have almost always seen eager physicians and naturopaths, and today many of them work with this individualizing concept.

Unfortunately however, very many of those certainly interested in device purchase have not reached the Black Belt from lack of time and sometimes perhaps also from lack of patience, and have gotten into BioResonance close combat with patients with a different colored belt. Then in such a manner of course you also gain a lot of time, but the huge number of used devices on the market speaks an eloquent language, and makes one suspect that the attractiveness of BioResonance would like to be measured only in victories.

Unfortunately the individualization concept has a catch!

You must not only learn BioResonance, but also the test procedures (if you have not already mastered this). In order to always offer the body the “correct” BioResonance parameters relevant to the present time, I have checked and customized the actual values over and over again with manual measurements. With one or two patients per day this action may be acceptable. However with more sessions it can rather quickly become strenuous and tiring.

Quintessence

Thus if it is possible through manual measurements on the patient to individually control the respective BioResonance device in the best way possible (similar to a [*manual*] gearshift with which you can get the best possible performance out of a car), then there must also be the possibility to control this individualization through automatic measurements of the patients (synonymous with a high performance automatic transmission).

Now whether it is Biotensor, Kinesiology or Electro-Acupuncture, every single measurement method is similar to a language and respectively has its own semantics and its own syntax. If [*the device*] is capable of recognizing this conformity and of transmitting onto others procedures – automatically – in the end you would have a system which through repeated measurements of the patients automatically selects the corresponding parameters and [*then*] treats. Such a self-calibrating BioResonance device frees you from the pressure of manual implementation, and thus you can make the logic of the Black Belt in BioResonance available for nearly every physician and naturopath – then it doesn’t matter whether or not he has additional qualifications in vegetative testing procedures. Also, the previously affectionately mentioned “helping hands” in the practice get full access at top of the art of BioResonance Therapy.

Dear reader, even with such a self-calibrating BioResonance device, the daily work with patients remains interesting, and unfortunately – I admit this openly – in spite of our best intentions sometimes also less successfully. This then also allows a naturopath now in his

17th professional year to be modest in the evaluation of his own abilities; but at the same time we refer to our motivations and further development in the values and learning from – yes – also from a more or less large number of therapy failures. There are these in all practices, with all methods, and with all healing experts. But with each day we start everything anew to let these aforesaid numbers shrink toward zero.

In this sense I thank you for your time which you have dedicated to reading this article, and I am available anytime for contact and lectures.

P.S. It has weighed heavily on my mind before deliberately mentioning within the writing of this article that I am the therapeutic developer of the KINDLING EASY. But because you worked this out anyway, I can also just as well say it at this point . . . I am very glad to have found a famous manufacturer who can transform my therapeutic approach into a device that hopefully also brings the world of BioResonance nearer to those therapists who have not yet "dared to approach". I wish you all a lot of success with BioResonance Therapy in your practice!

Author:

PaedDr. Uwe Uellendahl, HP

Certified Athletic Instructor and Naturopath
Established in his own private practice since 2000. Well known seminar instructor for BioResonance in Germany as well as in European and non-European foreign countries since 2002. Promotion to PaedDr doctorate from the Institute for Sports Science of the Comenius University, Slovakia in 2008.

Note that the Kindling EASY is **not** an OIRF recommended device. However, if you feel this device will work well in your practice, be sure to mention OIRF when you contact Kindling or their distributors. **You** will then receive a small discount off the purchase price, and a donation will be made to OIRF to support our ongoing research and work in the field of Biological Medicine.

For further information on the Kindling EASY, please mention OIRF when you contact:

Classical BioResonance Therapy

By Carolyn L. Winsor, BMus, BEd
(OIRF Managing Director)

© Copyright 2015, Carolyn Winsor, Penticton, BC Canada

Of course we can trace the use of energy in all its various forms for medical applications back to the beginning of man. But it is during the time of the past 60 or so years that has brought energy and biological medicine back into everyday use by natural healing experts around the globe. It is modern day research and technology that has given us the ability to return to and effectively use these natural energetic methods. But I'm not going to lay out thousands of years of history (yawn!) or use the knowledge of the ancients (double yawn!) to try and explain what we are experiencing in this exciting field today. We need only a few words to reach an understanding of the background and the basis of the ultimate energetic method – BioResonance Therapy.

By now most of you know the fundamental background of how **Dr. Franz Morell** was one of the original members of the study group who worked with **Dr. Reinhold Voll** developing and working with what later became known as **Electro-Acupuncture According to Voll**, or EAV (the first documentation was seen in the early 1950's). As changes and innovation crept into that study group, some of these brilliant physicians split away to work on their own developments. Many of those practitioners such as the dentist **Dr. Fritz Kramer** who helped develop the low pressure electrode tip, brought innovation, credibility and accessibility to this diagnostic method that remains to this day one of the most widely used point and medication testing methods.

In time Dr. Morell also split away from that prestigious study group. Initially Dr. Morell and his son-in-law, the engineer **Erich Rasche**, worked to develop such devices as the sender/receiver (transmission of the remedy information electronically) and the spin tester (measurement of the spin characteristics of remedies and bodily fluids). Dr. Morell's interests also extended to his friend and colleague the hydrologist **Prof. Louis-Claude Vincent** and together with Mr. Rasche they developed the BioElectronic Vincent (BEV) method for medical applications.

Mr. Rasche actually won a prestigious international award for his design of the device's unique measurement electrode which measured pH, resistivity and redox potentials of the patient's blood, urine and saliva.

As the end of the 1970's approached research began on the concepts of what we today call BioResonance. **BioResonance Therapy** was originally researched and developed beginning as early as 1978. The **Med-Tronik Company** was founded in 1979, and the first BioResonance devices – initially called "Input-Output" devices – were brought to market later that year as a MORA II. The name is of course composed of the first two letters of each name, **MO**rell and **RA**sche. With a team of dedicated engineers and technical personnel, Med-Tronik expanded into a range of biological medicine products that included some of the earliest BEV, PEMF and BioResonance devices and by 1982 was an acknowledged force within this field.

But all things change, don't they? The best example I can give you is to look briefly at the many methods of point and medication testing currently utilized in practice. Even with the beginnings of EAV there were those who were challenged by the testing method and tried new and different ways to collect the information they needed in their practice. It is this kind of "rebellion" that led to the development first of Biological Functions Diagnosis (BFD, first seen in the mid-1970's) and then on to VEGA (early 1980's). Today we can see multiple different approaches to each diagnostic method, and it always boils down to the fact that each individual practitioner understands and works with the procedures in their own way. While strict EAV works perfectly for one practitioner, only VEGA makes sense and works for another. As long as we have learned the basics of the method correctly, then it becomes a matter of personalizing the procedure for the individual practitioner's application.

In recent years we have seen a proliferation of new BioResonance devices coming onto the market. There are now multiple different devices and companies which have picked up the use of the term "BioResonance". It's to be expected as the method and the technology move into this century and incorporate modern electronics, software and technology. As **Dr. Uwe Uellendahl** says in his recent article [The Bridge, Volume 11, Issue #12, December 2015], "*But of course everybody longs for the day in which we finally find out for certain which electromagnetic oscillations in BioResonance Therapy can influence and control exactly which extra- and intracellular processes.*" That day will come. But for now we must all work to maintain the credibility of this method as it continues to evolve and move forward into the future.

I will be bluntly honest with you here, in that Med-Tronik has faced some horrendous challenges in recent years following the death of the engineer and founder, Mr. Erich Rasche. Quite frankly we almost lost this company due to mismanagement, criminal fraud and bankruptcy. The company was literally stripped of its many long term loyal employees and supporters, who then each sought other employment or development within the field. About 18 months ago, new owners (from China) took over

Med-Tronik. In the interim new (and some previous) staff have been hired and I must say that the changes and development have not only turned Med-Tronik around but are pushing it strongly into the future.

In spite of these challenges and changes, MORA[®] is the **only** true and classical BioResonance device available in the Biological Medicine market today. All other so called BioResonance devices are either copies of MORA or are some alternative type of technology. Included in this category are BICOM, BioKat, Holimed, Rayonex, IMEDIS, and too many others to mention here. And how can I make this kind of claim?

The essence of MORA BioResonance is the biological/electronic filter system. The concept of MORA is that when the patient is attached to the device, it will read the information of the patient's electromagnetic oscillations, process them in the device and instantaneously send them back to the patient as therapy. It is individualized, precise and highly effective. This proprietary and unique filter mechanism measures the incoming oscillations and can then:

- a) Amplify all incoming oscillations (to assist with diagnostics or therapy)
- b) Invert all of the incoming oscillations (designated \bar{A} or A-Bar, i.e. for allergy treatment)

And the key here which is unique to only MORA:

- c) The proprietary biological/electronic filter can separate Harmonious (H) and Disharmonious (D) oscillations

What? Yes, this is the true classical BioResonance Therapy application. By separating the Harmonious (healthy, calm, "good") oscillations from the Disharmonious (unhealthy, chaos, "bad") oscillations we are now able to process the information and give the body the support and information it needs to initiate self healing. Thus, in most MORA therapy applications you will see what is called the "H plus D-Bar" mode. The filter has separated the H and D components, and is returning the oscillations to the patient in such a way that the Harmonious oscillations are amplified, and the Disharmonious oscillations are inverted. Although we all know that you cannot cancel energy, we are in essence teaching the body to "cancel" the disharmonious oscillations similar to the way our noise cancelling earphones work when flying.

I'm not going into a long technical or theoretical discussion here either. But we must bear in mind that this filter system is proprietary and unique. Although there are many other so called BioResonance devices, they are not able (or allowed) to copy that filter system. However even though many of these newer devices coming onto

the market may consider themselves "just like a MORA", they are all only able to work with variations of the filter system. Some have only inversion, some have inversion and amplification, some are even only radionic and some have electronic-only filter systems.

I can't resist another short analogy here. Remember the restaurant patron looking at the menu in an exotic establishment that serves unusual dishes? As the waiter informs him that the alligator tastes "just like chicken", he decides that he will just have the chicken please. Hmmm.

I personally remember Dr. Morell promising us during a seminar that once we understand the concepts of BioResonance and the operation of the device, our use and application in practice will be limited only by our imagination.

But true to Dr. Morell's promise the result of this proliferation of new devices and approaches has brought us new research, new approaches and new applications for the MORA BioResonance devices. Like the old high school taunt - "I can do everything you can do, and I can do it better!" Throughout the "troubles" at Med-Tronik, OIRF stayed steadfast in our support of this company on the trust and hope that in light of the quality and unique technology of their devices they could recover. Like the fabled phoenix with the restoration of full service, repair, domestic and international marketing, training and r&d departments under the new owners, this is a company and a method that is ready to move into the future. Over the past year their upgrades and recovery have had an obvious influence throughout the field of Biological Medicine, and all I can say is "They're back!"

OIRF maintains a strong philosophical, commercial and policy connection with Med-Tronik that now dates back more than 35 years. In spite of the appearance of the many device copies, but yet based on our ongoing quality and effectiveness research, OIRF has chosen to maintain our exclusive but highly respected recommendation for MORA and Med-Tronik.

To close I would like to update you on the status of the various models and products from Med-Tronik. The MORA Beauty is pending acceptance in the USA. This is a cosmetic and wellness device using BioResonance as the basis of applications. The MORA Super made by Med-Tronik has been registered with Health Canada for more than 5 years. Additionally the following devices are in pending/application process with Health Canada:

- a) MORA Beauty
- b) MORA Nova
- c) MORA Color
- d) RM10

From both a professional and a personal perspective, I am proud and pleased that our loyalty and commitment to Med-Tronik and the MORA® brand allows us to continue to bring these proven quality products to our OIRF members and supporters. Here is the optimum way to enhance and complement the effectiveness of your diagnostic and therapeutic practice methods.

4 DVD SET NOW AVAILABLE!

MORA BioResonance Therapeutic Possibilities

Getting the BEST out of your MORA Technology

Date: Thursday, September 10, 2015 – COMPLETED! You missed it!

Intended audience: For beginners and advanced MORA® BioResonance users. For whatever model you are using, learn the true BioResonance Therapy applications.

You have the MORA, but how do you get the **best** out of it? This one-day lecture course guides you gently, starting with how to think about the way the MORA works, how to think about your patient's health problems, and how to match the two for optimum treatments.

For beginners, or for those who need a refresher, the basic concepts of classical BioResonance are clarified. Learn how to immediately provide effective treatments even if you don't know what you're doing yet.

As the day progresses, you receive expert guidance on how to tackle the most common underlying problems in health, including candidiasis, influenza, hay fever, food intolerances, "tummy bugs", Lyme disease, dental support, and hormonal issues. You will also learn how to verify that the treatment you've given has already been effective. Cases are presented to provide additional concrete information and summarize the day's information.

Lecture course features **Marguerite Lane, ND** from Australia. She has been in full time private practice since 2002 and has used the MORA Super since 2003. She is specialized in the BioResonance techniques of **Dr. Gottfried Cornelissen** of Germany.

This course was sponsored by **Occidental Institute Research Foundation** and presented in conjunction with the **Gateway Fdn. for Biological & Integrative Medicine** prior to the famous "Curing the Incurables" Conference held in St. Louis, Missouri September 2015.

We encourage you to take advantage of this opportunity to benefit from the therapy application and information presented by this well respected and experienced practitioner. Video was professionally filmed and edited.

Set of 4 DVDs US \$150 plus shipping (available for immediate shipment).

Practice Applications:

MORA® Nova

True BioResonance Therapy with the Patient's own Frequency Spectrum
From Med-Tronik, Germany

- Design meets Technology – presenting the MORA® Nova by Med-Tronik
- Standard EAV or MORA Optima assessment capabilities of the **Nova® MED Professional**.
- Full EAV assessment software incorporated into Nova® MED Professional for fast accurate testing and assessment using actual or electronic test sets.
- Optional “Tooth Testing” module for standard currents in the mouth, as well as assessment of dental foci.
- Cancer and Mitochondropathy Electronic Test Sets according to the research of **Dr. Gottfried Cornelissen** for dementia and cancer assessment and application.
- Or, VEGA-type testing capability has been incorporated into the MORA-Nova to allow utilization of available Electronic Test Sets – or of the coveted actual VEGA test set vials.
- For those who already have other testing and diagnostic methods in place, or for beginning BioResonance practitioners, the recently introduced **Nova® MED Basic** offers a less costly device with “therapy only” applications.
- **MORA® BioResonance Assessment and Therapy**
 - EAV, MORA Optima or Vega-style diagnostics to confirm infection.
 - Major applications for detoxification and intolerance.
 - The BioResonance concepts make MORA Therapy highly effective, besides just for detoxification, but also for allergies (especially), intolerances, skin disorders, bowel disorders and so many more
 - MORA alone will initialize the detoxification response and can be utilized individually as well as in combination with other therapies.
 - Support with drainage
 - Organ specific remedies (which can also be delivered electronically via BioResonance)
 - Lots of good water

Practice Applications (Mora Therapy Continued):

- Building immune system.
- Delivery of medication information.
- MORA BioResonance Therapy will always increase speed and efficacy of complementary therapies.
- Can also be complemented by:
 - BioPhoton Therapy – especially for skin rashes and other skin disorders
 - Inhaled Ionized Oxygen – for increase of healing energy and regeneration of cell respiration
- Follow this link for [MORA BioResonance details](#).
- For order, delivery & pricing information contact OIRF Office at 1-800-663-8342

➤ OIRF Resource Materials:

- For more information and instruction about point and medication testing with EAV see the OIRF: [Medication Testing Report](#) and the [EAV Desk Reference Manuals](#) (both available on disc).
- For more information and instruction about [Diagnostic and Therapeutic Techniques in Biological Medicine](#) with emphasis on BioResonance Therapy be sure to order the recently re-released videos of Dr. Walter Sturm's seminars.
- For a complete [listing of OIRF resource materials](#), including publications, reports, books and videos please follow this link to our website. There are full descriptions of all printed and recorded materials online.
- For a complete [listing of OIRF recommended instrumentation](#), including diagnostic, therapeutic and BioResonance devices please follow this link to our website. There are full descriptions of all instrumentation online.
- Of the three full "home-study" or "extension training" programs developed by Occidental Institute, two have been fully updated and are available in PDF format on disc. Research and publication of each of those programs has been pivotal in the development and application of Acupuncture and Biological Medicine in North America and around the world. Be sure to obtain your copies of these famous and well respected volumes for your library and study purposes.
 - Modern & Traditional Acupuncture: \$165
 - Master of Acupuncture Program: Translations of the ancient acupuncture classics (The Nei Ching consisting of the Su Wen and Ling Shu, as well as the "Difficult Classic" the Nan Ching) are still available in printed format – \$125
Work on scanning and reformatting these materials will progress slowly as time allows during our busy summer and fall seasons.
 - EAV Desk Reference Manuals, Parts 1 & 2 – \$200
 - Diagnostics and Therapeutics Seminars of Dr. Sturm – \$200

Get more details at <http://www.oirf.com/resources.html>

“EXTENSION TRAINING” PROGRAM IN MODERN & TRADITIONAL ACUPUNCTURE

Over twelve hundred pages of printed materials incorporating applicable materials from the supplementary textbook ([An Outline of Chinese Acupuncture](#)) and set of four charts (by [China Cultural Corp.](#)). Program starts off assuming you know nothing about acupuncture (a good place to start even if only as a thorough review of the basics) and takes you right through to the most heavy-duty advanced aspects of true, ‘energetical’ acupuncture. The finest and most comprehensive material in the English language, covers all seventy-one meridians of traditional acupuncture; that ‘missing sixty percent’ of acupuncture knowledge most “acupuncturists” have never even heard of; and, the modern electronic ‘needle-less’ treatment methods (Electro-Acupoint Therapy) now so popular.

Over 3,000 students were originally enrolled in this famous Extension Training Program, and the OICS graduate listings read like a “Who’s Who of Acupuncture” in the English speaking world. This program takes you as far as anyone possibly can in a ‘written’ format prior to the clinical finesse and practicum needed to round out your acupuncture study to professional levels.

FULL THIRTY-THREE LESSON PROGRAM NOW AVAILABLE ON DVD

Price includes disc with all 33 Lessons, applicable supplementary textbook (An Outline of Chinese Acupuncture) passages and representation of set of acupuncture charts (China Cultural Corporation set of four). [Current editions of the textbook and charts can be easily obtained from suppliers of acupuncture books and supplies.] Price does **not** include printed materials, binders; or, any tutorial, examination, or certification privileges. Follow above link for full details. **Full set on one disc available for CDN \$165.**

Videotaped “DIAGNOSTICS” AND “THERAPEUTICS”

Seminar/Workshops by Dr. Walter D. Sturm† of OIRF Staff

* 1944-2004 †

Part One on Diagnostics:

- Electronic point measurement
- Medication testing, and more

Part Two on Therapeutics:

- **MORA-Therapy**
- Electronic Homeopathy
- Remedy Information Transfer, and more
- *Optional day on his other therapies!*

Follow this link to see a full description of these videotaped [“Diagnostics and Therapeutics” Seminar/Workshops](#) by the late Dr. Walter D. Sturm† of the OIRF Staff.

Available on five (5) DVD’s plus one (1) CD with all overheads and extensive handouts materials for CDN \$200 (plus shipping).

➡ **Conferences and Conventions:** As an ongoing approach to bring this information and education to a broader range of practitioners this year OIRF will sponsor speakers and lecturers in a number of conferences and events throughout the USA and Canada. Here are **some** of the events where our OIRF Board of Directors and Advisors are giving presentations and participating. As we move through the busy fall season, plans are already underway for many more events for the New Year 2016.

Be sure to check out the events and conferences announcements enclosed and on the [Calendar of Events](#) on our website. Make plans **now** for which events you will attend this year and on into 2016. Your support for the organizers is greatly appreciated, and gives you the return of fascinating, informative and educational programs that will enhance your practice – and CEU's! OIRF directors, advisors and/or members are active in each of the recommended events. See Pages 5, 12 and 13 for further details.

➤ Here is a listing of **MORA Therapy and BioResonance training sessions** available in English. The following three sessions will be held in Friesenheim, Germany at the Med-Tronik training center:

April 8-9, 2016	Basic MORA and BioResonance
July 1-2, 2016	Advanced MORA and BioResonance
October 7-8, 2016	Masters Level MORA and BioResonance

➤ **MORA BioResonance Therapeutic Possibilities**, 1 day course on therapeutic applications with With **Marguerite Lane, ND**, Australia. 4 DVD set of video recordings are now available through OIRF for US \$150 plus shipping.

➤ As US certifications for the MORA Beauty are finalized, OIRF and Med-Tronik will be sponsoring exhibit areas at a number of conferences throughout the USA and Canada during 2016. Watch for dates and locations to be announced early in the New Year for an opportunity to see this remarkably effective device that can rapidly generate income for your practice.

➤ Did you miss the **Gateway Foundation for Biological & Integrative Medicine** conference on "**Curing the Incurables**" in St. Louis earlier last month? Man, I gotta say you missed a good one! Nearly 120 participants heard such speakers as **Dr. Dietrich Klinghardt, Dr. Garry Gordon, Dr. Dan Beilin, Dr. Jeremy Kaslow, Marguerite Lane, Dr. Michael Gurevich, Dr. Michael Rehme, Dr. Robert Cass and Dr. Simon Yu**. An optional pre-conference workshop with **Marguerite Lane, ND** covered **MORA BioResonance Therapeutic Possibilities**.

But all is not lost or missed. Video recordings of all sessions are being prepared and will be available for purchase shortly. Follow this link for information on [Aurora Recording](#) and to find the [order form for the conference lectures](#).

➤ **Training as a Mayr Physician in the English language!** For the first time in more than a decade, the *International Society of MAYR Physicians* is holding an English language training program from 29 May through 10 June 2016. Course will be held at the Kurhotel Vollererhof, Salzburg Austria. Course instructor will be **Dr. Sepp Fegerl**. Full certification is available only for Medical Doctors, however all other practitioners are welcome to take the training for reduced certification. This is an exceptional opportunity. All interested should contact OIRF for further details or contact the Mayr Society directly at office@fxmayr.com (be sure to mention OIRF).

➤ **50th Anniversary Medicine Week Congress**, Oct. 26-30, 2016 (dates unconfirmed at this time) in Baden-Baden, Germany with OIRF Advisors, Directors and Germany Tour participants attending. Usually more than 3,000 doctors participate with nearly 200 lectures, workshops and courses (German and English language). Main theme for 2016 not yet announced – but it will be a great celebration! Exhibit area with more than 220 exhibits provides you with an excellent insight into the big product offerings in natural healing and complementary medicine. There you can find out directly, and compare. Contact OIRF for attendance possibilities.

➤ **Biological Medicine Tour #43 to Germany**, October 25 to 31, 2016. Join us for our **43rd** group tour including the world famous “Medicine Week” Congress in Baden-Baden. Tour program also includes exclusive OIRF English language lectures from renowned German clinicians and researchers as well as pharmacy and clinic visits. Speaker, event and activity schedules will be announced early in the New Year and will also be posted on our website as they come available. Registrations for this program will open early and because attendance for the program will be strictly limited we recommend early registration.

➤ Follow this link to our website to see Issue #12 in print/PDF format.

➤ **Updates, Reminders and Announcements:**

➤ As previously mentioned plans are already underway for the **43rd OIRF Biological Medicine Group tour to Germany for 2016**. This 43rd Germany Tour will definitely take place in conjunction with the **50th Anniversary Medicine Week Congress in Baden-Baden** in Oct/Nov of **2016!** Tentative dates are set for Oct. 25-31, 2016. Is this enough notice? Meet us in Frankfurt to participate in this exciting and exclusive program.

➤ Watch for Volume 12, Issue #1 of the “The Bridge” newsletter to arrive in your Inbox around mid-January 2016. Additionally, there are a number of new and exceptionally well written articles by Med-Tronik researchers and instructors that have been published in the German CO'Med journal. Carolyn is busily translating as many of them as possible for the newsletter issues in between Health Canada and OIRF projects and activities. The January “Bridge” issue will be another big one!

➤ Visit our **Facebook** page – will you be our friend?

I trust you have found much of interest in these pages. All of our final 2015 events and activities have been completed as this year draws to an end and yet already there are many exciting plans for 2016 underway. Additionally there are various informational articles being prepared for the next Issues of Volume 12 of "The Bridge". Electronic publication with access open to all will continue throughout 2016 and we will continue to bringing you that cutting edge information for which OIRF is famous.

We look forward to meeting you during our forthcoming 2016 activities and programs. As always your comments are welcome. Remember that this is your newsletter – your suggestions, article contributions, critiques, FAQ's and compliments – are gratefully accepted.

We would like to wish all of you Happy Holidays, Happy Hanukkah, Happy Kwanzaa and a Very Merry Christmas from all of us here at Occidental Institute.

Yours in health,

Carolyn
