## THE BRIDGE

### Linking Practitioners of German Biological Medicine

Volume 10, Issue #6, June 2014

Tuesday, 17 June 2014

Dear Colleagues, Friends and Supporters of OIRF,

➡ **Welcome to Volume 10, Issue #6 of "The Bridge" newsletter for 2014!** As mentioned, here is the translated journal article about the after effects of HPV vaccinations. This is some very interesting reading and there are also some practical application hints and tips from **Marguerite Lane, ND** from Australia. I have already found an article on Color Therapy that will go into the translation process for Issue #7 due for publication in Mid-July. Be sure to watch for that information as well as our usual "hot" summer discount pricing on various devices.

➡ The **OIRF 41st Biological Medicine Tour program to Germany!** This group tour program has been finalized and the itinerary is set. This year we have two feature speakers: **Juliane Sacher, MD** (famous for her research with AIDS and cancer) will tell us about her latest research into the connections between chronic diseases and increasing vaccinations, while **Olaf Kuhnke, MD** will tell us about some classical homeopathic therapies for pain treatment and also about his famous Ortho-Bio-Med Center in Switzerland.

Additionally, there are visits to the exhibits at the **Baden-Baden Medicine Week Congress**, attendance at some Med-Week lectures and several lecture sessions privately arranged for our group. You will experience a busy but highly informative schedule with like-minded companions who share your interest in biological and alternative medicine without the hassles of making personal travel arrangements while in Germany – the hotels are set, our private motor coach is in place and even many of the excellent meals have already been planned. All we need now to make this program a success is your early registration.

Follow this link to the [Germany Tour](#) page on our website for itinerary, lecture, registration and activity details. I've given you lots of advance time notice – plan now to join us for this educational (and fun) tour program! Registrations have already been received from Australia, Brazil, Canada and the USA. **Register early** to ensure space is available and do not miss the opportunity to participate in this popular and educational tour program.

➡ All 2014 issues of "The Bridge" newsletter will be sent to you by email and then published on our website. **Access is open to all.** Follow this link to get your PDF print copy of "The Bridge" Volume 10, Issue #6.

➡ Please see Page 11 of this newsletter issue for details on a **special grant program** that has been established in the name of **Marietta Service**. You are invited to apply for grant assistance for students or new practitioners to assist them in learning about biological and alternative medical methods.

Over the past few years we have noticed a strong trend among the newer practitioners and students to rely on "prolotherapy" and "prescribing". This rote response to almost all patients by the newer ND's and acupuncturists appears to be leading us further and further away from the true naturopathic and biological medicine approaches that have been so successful for most our "more experienced" practitioners (I didn't say old so don't be picking on me!). Here is an opportunity for you to recommend a colleague or promising student for some financial assistance to get them started and to give them some exposure to these highly effective methods.

➡ At this time, as so often happens during our daily activities and work at OIRF, our founder **Dr. Walter D. Sturm** comes back into our minds. It is difficult to believe that this summer it will be 10 years since he passed away. I'm really not sure where all the time has gone. **Chad Jerrett** worked with us as our Administrative Assistant when we were located in the Vancouver, BC area and has stayed with us (via remote) as our resident computer guru. I received the following comments from him shortly after the re-release of Dr. Sturm's Diagnostic and Therapeutic seminar videos and the Modern & Traditional Acupuncture Training Program:

*"Congratulations on getting the projects done! I still remember the binders and stacks of copies. I drove past your old place in Ladner this morning after dropping my son off at high school and was thinking of you and Walter, so I chuckled when your email arrived. It really doesn't seem all that long ago, yet it seems a lifetime away. You'll laugh. Just this morning I told my daughter "Your kindness and generosity are exceeded only by your overwhelming abilities and charming good looks" [an expression frequently used by "The Boss"]. She looked at me and said "Daddy, you're being silly." If she only knew . . . I'm not telling you something you don't already know and I hope this doesn't make you sad, but I do miss the Big Guy."*

As we approach this summer I would like to put together a small memorial page for him. Do you have a happy, funny or humorous memory of an experience with Walter? He was such a "character" I am sure there are lots of tales out there! Share them with us and let's keep his contributions to this field of Biological Medicine alive.

➡ Sorry – but as we move into summer (here in North America) and vacation time I just could not resist this oh so true chuckle:  
Vacation really begins when Dad says "I know a short cut!"

➡ So, here are your newsletter items for this Issue #4 . . .

## **Epilepsy After an HPV Vaccination**

By Uwe Heyeres, MA, HP

**From an article in Naturheilpraxis, Volume 67, March 2014 (3/2014)  
Machine Translation by SYSTRAN, Lernout & Hauspie, LogoMedia & Promt  
Translation & redaction by: Carolyn L. Winsor, OIRF**

© Copyright 2014, Dr. Uwe Heyeres, Eckersdorf, Germany

The homeopathic treatment is described for a complicated focal temporal lobe epilepsy with a suspicion of Ammon's horn sclerosis\* on the left. The clinical picture emerged based on several vaccinations and was ultimately triggered by a Gardasil® vaccination against Human Papiloma Virus<sup>1</sup> (HPV).

### **The Acute Events**

In May 2012 a 15-year old girl came to see me accompanied by both her parents. According to a dismal report from the treating clinic, the girl suffered from a complicated focal temporal lobe epilepsy with an additional diagnosis of Ammon's horn sclerosis<sup>2</sup> on the left. At the time of her interview she was treated with Keppra<sup>®3</sup> (250-0-750) and Lachesis C1,000 (1x monthly 4 globuli on the tongue). The attacks began 20 days after the administration of a Gardasil® vaccination and were not calmed down by medications. Already on the evening after the vaccination the girl complained of dizziness<sup>4</sup> as well as sensations of numbness and electrical shocks in the arms and legs, making it more difficult for her to fall asleep. The temporal connection to the Gardasil® vaccination gave the senior treating physician at the clinic grounds for a spinal tap to exclude a fluoride encephalitis. The EEG findings showed a left-sided frontal and temporal focal disturbance with repetitive sharp-slow-wave-complexes as an indication of a focal epileptic excitability increase. The MRT of the skull resulted in an unobtrusively normal finding of the brain structures except for the suspicious diagnosis of "Ammon's horn sclerosis". On a physical level, in spite of highly dosed medication with Keppra®, in each case at approximately two week intervals a nightly convulsive seizure (always between 2 and 4 AM).

\* This can also translate as "sclerosis of the hippocampus".

However in March there were already six attacks which worried the parents very much. The parents reported that up until now the observable attacks stopped in several minutes in each case, accompanied by violent twitches of all extremities and were [also] accompanied by very strong salivation as well as by upwards turned away eyes. The attacks always emerged from out of sleep and afterwards were not recalled any more by the patient. Until now an up to 24 hour continuing feeling of sickness, which got worse by inhaling and was accompanied by the sensation “to inhale cold air” always appeared on the following day. For many hours the face felt as if paralyzed, articulation was made difficult, the skin on the face was cold, and everything only became worse through speaking.

In some cases on the day after the convulsive seizure there were even noted regular paralysis symptoms on the legs. The back hurt very piercingly in the lumbar area so that bending down was impossible for the whole day. Since the beginning of the convulsive seizures a clear word-finding disturbance attracted attention. The parents were very concerned about their daughter, because they noted that their daughter’s social sphere was very unsure and reacted with restraint, which gave their daughter a hard time. Furthermore it frightened the parents very much that their daughter felt fear and disgust with the thought of her illness and since being medicated with Keppra<sup>®</sup> seemed very secluded, tired, listless, brooding/sad, as well as extremely moody and irritable. Meanwhile she was afraid to sleep alone in a room at night, did no more athletic sports and greatly gained weight. This is as far as the unprompted report of the patient and her parents.

### **Case History**

The mother reported a sudden bleeding during pregnancy week nine, which by means of an ultrasound examination was diagnosed as a bladder pregnancy. However the resulting arranged curettage was omitted on the request of the mother. The first half of the pregnancy course was quite normal in spite of the menacing examination results. In pregnancy week 21 early labor pains started which were treated medicinally. This time meant great psychic stress for the nascent mother. Nevertheless, the birth proceeded in pregnancy week 37 without complications. The newly born infant showed some thick black back hairs and there was a large skin mark in the lumbar area called a “Eurasian Spot” by the parents. The patient reacted each time to each of the first standard vaccinations with fever, with restless nights and with herpes labialis (always on the left side). From approximately the fourth month of life she was often extremely tense, overextended herself and then sweated very strongly in her child car seat. According to the account of the parents, the subsequent vaccinations in the sixth and eighth years were always accompanied by fever, feverish infections and the herpes labialis.

As an infant the patient had a three day fever, and at the toddler age went through chicken pox and scarlet fever. Up to the beginning of puberty febrile infections appeared several times annually with a very stubborn and hacking (dry) cough persisting for weeks, and regularly appearing herpes labialis (always left sided). The persistent infections lasting for days not infrequently ran with a temperature rise over 40°C and brought the family many restless nights. Fever reducing medications and antibiotics came into use very often in these years.

### **General, Body and Emotional Symptoms**

Fine white scales and small crusts which often itched were noted on the scalp. The skin on the face appeared notably oily, according to the patient she immediately reacted to exposure to sunlight with tingling sensations and on vacation by the sea the whole skin picture regularly became “gritty” like goose bumps. Moreover, a strong acne vulgaris dominated, which during menstruation tended to the formation of thicker and more painful lumps. In the mornings the eyes had regularly swollen thickly and notably watered strongly. If the earrings were removed the earlobes immediately swelled. Silver jewellery caused black discoloration on the skin. The herpes labialis attacks were absent for about three years (at that time treated with Natrium muriaticum C1,000) and again began the aforementioned Gardasil® vaccination only shortly after. For a long time she complained about burning, recurring aphthae on the inside of the cheek and under the tongue. The patient had noticeably full lips (especially the lower lip), which were often dried and cracked. The mouth taste often seemed acid to her. The left knee reacted with athletic burden with inflammatory swelling and with strong pains. Since the beginning of puberty the feet tended to swell and always felt cold. The patient preferred to eat cold [things] and favored drinks from the refrigerator. There was a clear desire for strongly spiced, sharp and above all salty things, and especially oranges. An aversion existed for milk, slimy [snails], fish and all kinds of vegetables. In the mornings she was bothered by a distinctive tendency to clear her throat with much mucus in the throat. With a sore throat she always felt a very disagreeable constriction/tightness in the throat. The patient indicated a fast and strong, but odorless, sweating above all under the arms, on the temples and on the upper lip. She preferred cool weather conditions, warm temperatures were rather disagreeable to her. In summer she was often stung by mosquitoes and reacted to them with strong and inflammatory swellings. She described herself as spirited, touchy, thinks she is always right, always has the last word, and tends toward outbursts of rage with aggression. She loves traveling, tends toward creative school subjects and to languages rather than to the scientific school subjects. She was afraid of arguments and of being unpopular or of losing important people.

### **Family Anamnesis in Point Form**

**Mother:** Stubborn acne, mycosis, strong menstrual discomfort, painful plantar warts, often strong headaches, suppurating inflammatory reactions to costume jewellery earrings, neurodermatitis, chicken pox and scarlet fever in childhood.

**Father:** Frequent tonsillitis as a child, cardiac infarction and afterwards coronary fistula, persistent back pain.

**Sister:** Strong infant colic, diaper dermatitis and repeated conjunctivitis in infancy. Small and dainty child, many fears, fits of rage, skin on the soles of the feet occasionally completely peels off, night sweat smelling like Maggi, strong nightly salivation, claw-like nails.

Furthermore, within the relationship sphere fibromyalgia, alcoholism, addiction ailments, emotional illnesses, astigmatism, thyroid gland disturbances, cardiac illnesses, intestinal illnesses, allergy tendencies, tuberculosis with the (maternal) grandfather and different cancer illnesses were known.

### **Treatment**

The homeopathic treatment of these extreme vaccination reactions was begun at the end of May 2012 with Medorrhinum LM 18, a high caliber vaccination aftereffect medication from classical homeopathy (Repertorisation). Intake instructions: every third day 3 drops Medorrhinum given in a glass of water, stir hard, take 1 teaspoon full of it, begin creeping in with 1 drop and, if no bigger reactions appear, with the weeks slowly increase to 3 drops. Request progress report four weeks after intake beginning.

The first feedback came after five weeks time of Medorrhinum intake. According to the report by the mother there has been only one attack in this time period. The patient had persistent light pains in both wrists and in the calves. A left sided headache appeared every now and then, and now the eyes hurt more often than before the treatment with Medorrhinum (burning). It was agreed to reduce the dose to 2 drops Medorrhinum in the water glass and with satisfactory [*treatment*] course to report once more after about two months.

Then the second feedback did not come until the end of November 2012 (after the fifth month). Since the last feedback in July there have been no more attacks. The complaints existing from the first feedback quickly faded away with reduction of the Medorrhinum dose and up to this date have stayed away. In the fall the parents phased out the anticonvulsant Keppra<sup>®</sup>. In November 2012 the attending neurologist certified a normal EEG. The patient is now attack free since the middle of July 2012.

## Summary

A very striking case of an undesirable drug reaction to a vaccination which fortunately did not leave any remaining damages.

It became clear in the course of the first detailed homeopathic anamnesis that the patient already had reacted to all the preceding vaccinations with fever and herpes labialis. The hypersensitivity appearing in the fourth month of life while resting in the child car seat (extremely tense, overextended and accompanied by sweating attacks) gives rise to the suspicion that already the first vaccinations had a negative influence on the developing nervous system of the patient.

From the homeopathic point of view the epilepsy treated here originated in the context of all the applied vaccinations, all the suppressing medical treatments and the extremely distinctive miasmatic burden of the patient, here the hereditary sycosis<sup>5</sup>. In fact the aforementioned Gardasil<sup>®</sup> vaccination stands in direct temporal connection to the appearance of the convulsive seizures, nevertheless it represents only the peak point in the miasmatic dynamics of all the preceding medical applications. The suitably selected homeopathics had a prompt and lasting effect. A continuing antimiasmatic treatment was taken into consideration by the parents.

## Remarks

1. The HPV-Virus Type 16 and 18 is supposed to play a priority role with the origin of cervical cancer. In the meantime altogether about 100 different types of HPV-Virus are known.
2. The Ammon's horn is part of the hippocampus and is localized at the side of the temporal lobe of the brain. In the medical view damage to this region is the most frequent neuropathological finding with temporal lobe epilepsy. However this diagnosis made in this case was explained as untenable in the further course by two consulted independent neurologists. Mistakes in the interpretation of the black and white shadows of the MRT-exposures are not rare.
3. Keppra<sup>®</sup> is the trade name for the anticonvulsant with the active ingredient of Levetiracetam. This active ingredient releases increased amounts of the transmitter substances gamma-amino butyric acid (GABA) into the brain, which on the other hand reduces the stream of chloride ions into the nerve cells and thus hinders the buildup of tension potential of the nerve cells. Epileptic activity can be decreased with this active ingredient or even be suppressed. Very often observed as life effects of this suppressing treatment strategy (Keppra<sup>®</sup>), i.e. in more than 10% of cases, are weakness and dizziness or somnolence, and in about 1%-10% of cases abdominal pains, agitation, anorexia, ataxia, dazed/stupor, depression, diarrhea, diplopia, dyspepsia, eczema, **emotional instability/mood fluctuations**, vomiting, exanthema, hostility/aggression, weight loss, **increased weight, insomnia, itching, convulsions**, headaches, myalgia, amnesia, **nervousness/irritability**, personality disturbances, thrombocytopenia, tremors, increased cough, dizziness, and many more emerge. → The emphasized symptoms were also complained about by this patient. (Source: [http://www.deutschesapothekenportal.de/fileadmin/bestellungen/fi\\_keppra.pdf](http://www.deutschesapothekenportal.de/fileadmin/bestellungen/fi_keppra.pdf))

4. For clarification that the following described symptoms of the patient did not represent an isolated case, here is an excerpt from a statement of the “Ärzte für Individuelle Impfentscheidung, e.v.” [*The Physicians for Individual Vaccination Decisions, Inc.* – note that the following is an English translation of their German language statement]. “*Since the summer of 2007 the Permanent Committee on Vaccinations (STIKO) recommends the vaccination of all 12-17 year old girls against the HPV-Virus 16 and 18. Thereby they should be protected from cervical cancer, for which formation both these virus types are supposed to play a priority role ... The side effect potential of the HPV vaccination is absolutely unknown. Already in the vaccination studies autoimmune and allergic side effects were conspicuous. The worst thing to suspect, if one assumes that the usual passive reporting system only shows the tip of the iceberg, is: In the first 16 months after introduction of the HPV vaccination the U.S. American reporting system VAERS (Vaccine Adverse Event Reporting System) was informed about 3,461 suspicious cases of vaccination complications – one fifth of all currently reported undesirable events after vaccinations. More than ten percent of the reports were classified as serious, among them neurological problems like **speech disturbances, sensitivity disturbances, convulsive seizures and paralysis illnesses**, e.g. 15 cases of Guillain Barré Syndrome. With 18 of 42 women who were mistakenly vaccinated during pregnancy complications occurred ...*”  
(Source: <http://www.individuelle-impfentscheide.de/index.php/stellungnahmen-mainmenu-13/39-stellungnahme-zur-hpv-impfung>)
5. The miasm concept (Hahnemann and J.H. Allen) which can help to reduce the complexity of chronic diseases and thereby to attain a productive case understanding, can be studied very well in the books of Dr. Joachim Grätz.

## Practice Application:

### Hints, Tips and Remarks from *Marguerite Lane, ND*, Australia

On the occasion that a client (adult or child) has had vaccine(s), I test them for resonance with the toxins, nosodes, and supportive remedies listed below.

I use Dr. Cornelissen's technique, and I prefer the Large Intestine ting point for testing.

#### Nosodes:

Depends on which vaccines they've had. If they do not know or remember which ones were given, I test all the vaccine nosodes that are in ELH Nosodes test set.

#### Toxins:

Mercury / Thiomersol  
Aluminium  
Formaldehyde  
Sorbitol  
Phenoxyethanol  
Hydrolised gelatine

#### Drainage Remedies:

Thuja  
Ant tart  
Arsenicum  
Lathyrus  
Silicea  
Stramonium  
Variola compositum  
Staphysagria

#### Sarcodes:

Immune system – thymus, spleen, lymphocytes, granulocytes  
Brain – Meninges in particular. Possibly other structures, based on any symptoms that present.  
If Gardasil® was given, then test the reproductive organs as well.

#### Bach Flower Essences, if needed:

Crab apple (if they feel dirty)  
Impatiens (if they feel stressed)  
Mimulus (if they have fear)  
Rescue Remedy (if they are out of sorts)

#### Supportive homeopathic remedies, if reactions to vaccines:

If they are having a suspected reaction to one or more vaccines, then I would test the relevant homeopathic remedies based on their symptoms, such as\*:

- Aconitum nap (sudden pain, first choice for inflammation and high fever; fear, anxiety and physical or mental restlessness; doesn't want to be touched)
- Ant tart (chicken pox-like skin eruptions; cough generally present)
- Apis mell (puffiness & oedema; stinging pain; soreness, swelling & an intolerance or aversion to heat; rosy hue of skin; typical allergy reaction; hives with intolerable itching & prickly feel)
- Belladonna (high fever)
- Calc carb (if sx mimic the vaccine disease)
- Chamomilla (peevish, temperamental; hyperactive & restless; colic; extremely sensitive to pain; vomiting; especially useful with restless, whining children who can only be quieted by carrying or comforting)
- Hypericum perforatum (excessive painfulness)
- Ledum pal (Chilly, lack of body heat; best if given immediately after vaccination)
- Pulsatilla (great sensitivity; tearful, clingy & weeping; wants to be cuddled; unpredictable or contradictory emotional nature)

\* I originally came across this list in an excellent article in the Townsend Letter. Here is the reference: Brynoff Steve, Dec 2006. "Preventative Homeopathy; a historical perspective" *Townsend Letter*, Dec 2006 p 82.

**Treatments:**

Treatments will be Cornelissen's #078 (Remedy Transfer Program with Basic Therapy)  
ELH: drainage remedies, sarcodes, Bach Flower Essences, supportive homeopathic remedies  
Followed by Cornelissen's #077 (Universal Neutralisation Program)  
ELH: nosodes, toxins

**Practice Application:**

- Standard EAV or MORA Optima assessment capabilities of the **Nova® MED Professional**.
- Full EAV assessment software incorporated into Nova® MED Professional for fast accurate testing and assessment using actual or electronic test sets.
- Optional "Tooth Testing" module for standard currents in the mouth, as well as assessment of dental foci.
- Cancer and Mitochondropathy Electronic Test Sets according to the research of **Dr. Gottfried Cornelissen** for cancer assessment and application.
- Or, VEGA-type testing capability has been incorporated into the MORA-Nova to allow utilization of available Electronic Test Sets – or of the coveted actual VEGA test set vials.
- For those who already have other testing and diagnostic methods in place, or for beginning BioResonance practitioners, the recently introduced **Nova® MED Basic** offers a less costly device with "therapy only" applications.
- **BioResonance Therapy Applications:**
  - Assistance with detoxification and intolerance.
  - Highly effective therapy for allergic and intolerance responses.
  - Building immune system.
  - Delivery of medication information.
  - Follow this link for [MORA BioResonance details](#).
- For order, delivery & pricing information contact OIRF Office at 1-800-663-8342

➡ A fund totaling CDN \$3,000 was recently received from **Marietta Service** to sponsor important OIRF staff travel and expenses. This funding is now being “paid forward” with the establishment of a series of grants available to students and new practitioners to assist them in entering the exciting field of biological and energetic medicine. Grants in the following amounts are now available:

**OIRF reference materials:**

Five grants of \$150 each

**OIRF seminar/workshop video materials:**

Five grants of \$150 each

**OIRF Germany Tour program:**

Three grants of \$500 each

To apply for this funding or make a recommendation for a student or new colleague, please submit (by fax or email) a short application including the following details:

- Application for personal funding       Application for a student I know  
 Application for a new practitioner/colleague

(Please print clearly in this part!)

## Videotaped "DIAGNOSTICS" AND "THERAPEUTICS"

Seminar/Workshops by Dr. Walter D. Sturm† of OIRF Staff

### Part One on Diagnostics:

- Electronic point measurement
- Medication testing, and more

### Part Two on Therapeutics:

- **MORA-Therapy**
- Electronic Homeopathy
- Remedy Information Transfer, and more
- *Optional day on his other therapies!*

Follow this link to see a full description of these videotaped ["Diagnostics and Therapeutics" Seminar/Workshops](#) by Dr. Walter D. Sturm† of the OIRF Staff.

Available on five (5) DVD's plus one (1) CD with all overheads and extensive handouts materials for CDN \$200 (plus shipping).

Published in Canada by: **Occidental Institute Research Foundation**  
P. O. Box 100, Penticton, BC V2A 6J9 Canada  
Phone: 800-663-8342 or (250) 490-3318  
Website: [www.oirf.com](http://www.oirf.com) Email: [support@oirf.com](mailto:support@oirf.com)

➡ Have you ordered your copies of the recently released programs and videos?

Here's a short listing of the DVDs ready to be shipped on receipt of your order:

- Modern & Traditional Acupuncture – \$165
- The translations of the ancient acupuncture classics (The **Nei Ching** consisting of the **Su Wen** and **Ling Shu**, as well as the "Difficult Classic" the **Nan Ching**) are still available in printed format – \$125
- EAV Desk Reference Manuals, Parts 1 & 2 – \$200
- Diagnostics and Therapeutics Seminars of Dr. Sturm – \$200

➡ For more information and instruction about point and medication testing with EAV see the OIRF: [Medication Testing Report](#) and the [EAV Desk Reference Manuals](#) (both available on disc).

➡ For more information and instruction about [Diagnostic and Therapeutic Techniques in Biological Medicine](#) with emphasis on BioResonance Therapy be sure to order the recently re-released videos of Dr. Walter Sturm's seminars.

## **“EXTENSION TRAINING” PROGRAM IN MODERN & TRADITIONAL ACUPUNCTURE**

Over twelve hundred pages of printed materials incorporating applicable materials from the supplementary textbook (*An Outline of Chinese Acupuncture*) and set of four charts (by China Cultural Corp.). Program starts off assuming you know nothing about acupuncture (a good place to start even if only as a thorough review of the basics) and takes you right through to the most heavy-duty advanced aspects of true, ‘energetical’ acupuncture. The finest and most comprehensive material in the English language, covers all seventy-one meridians of traditional acupuncture; that ‘missing sixty percent’ of acupuncture knowledge most “acupuncturists” have never even heard of; and, the modern electronic ‘needle-less’ treatment methods (Electro-Acupoint Therapy) now so popular.

Over 3,000 students were originally enrolled in this famous Extension Training Program, and the OICS graduate listings read like a “Who’s Who of Acupuncture” in the English speaking world. This program takes you as far as anyone possibly can in a ‘written’ format prior to the clinical finesse and practicum needed to round out your acupuncture study to professional levels.

### **FULL THIRTY-THREE LESSON PROGRAM NOW AVAILABLE ON DVD**

**Price includes** disc with all 33 Lessons, applicable supplementary textbook (*An Outline of Chinese Acupuncture*) passages and representation of set of acupuncture charts (China Cultural Corporation set of four). [Current editions of the textbook and charts can be easily obtained from suppliers of acupuncture books and supplies.] Price does **not** include printed materials, binders; or, any tutorial, examination, or certification privileges. Follow above link for full details. **Full set on one disc available for CDN \$165.**

## **Occidental Institute Research Foundation**

### **40th Biological Medicine Tour to Germany**

Tuesday, October 28 through Monday, November 3, 2014

**Theme:** Clinical Applications in Biological Medicine

Hear privately arranged English language lectures from:

- **Dr. Juliane Sacher** – Connection between chronic disease & vaccinations
- **Dr. Olaf Kuhnke** – Naturopathic therapy for pain and fibromyalgia
- **Dr. Silvia Binder** – ONDAMED Therapy
- **Dr. Daniel Beilin** – Thermodiagnosics
- **MORA BioResonance Therapy**
- **Ionized Oxygen Therapy**
- New methods of **Dr. Helmut Schimmel**
- Visit from a German **Biological Medicine Hospital Clinic**

Attend Medicine Week (English) lectures featuring:

- **Dr. Frank Beck** – Magnetized filtered water
- **Dr. Dietrich Klinghardt** – Magnetic Field Therapy
- **Dr. Ulrike Heller** – Cepes Laser

- Our private lectures present the latest information and research in our field, with ample time for questions and hands-on.
- An opportunity to talk with like-minded colleagues and learn from the experience and expertise of attending OIRF Directors and Advisors.
- Visit and participate in the famous Medicine Week Congress in Baden-Baden
- Hear from a well known German pharmacy of biological remedies
- Travel in comfort with plenty of room for luggage
- Tour prices include full tour program, single room accommodations and most meals
- Be treated like family with good food, good friends and good conversation in friendly hotels

**ADVANCE REGISTRATION IS RECOMMENDED**

**[Biological Medicine Tour #41](#) information and [Register here](#)**

**For more details contact:** Occidental Institute, [www.oirf.com](http://www.oirf.com); E-Mail: [support@oirf.com](mailto:support@oirf.com)

PO Box 100, Penticton, BC V2A 6J9 Canada and register at 800-663-8342 or (250) 490-3318

➡ **Conferences and Conventions:** Please watch for announcements of the speakers, venues and details of these exciting OIRF activities and events for the year 2014:

➤ **Biological Medicine Tour #41 to Germany**, October 28-November 3, 2014 (dates for the 48th Baden-Baden Medicine Week Congress have been confirmed). Join us for our **41st** group tour including the world famous "Medicine Week" Congress in Baden-Baden. Tour program also includes private OIRF English language lectures from renowned German clinicians and researchers as well as pharmacy and clinic visits.

➤ Watch for speaker, venue and date details for a series of seminar/workshops focused on practical application of OIRF recommended diagnostic and therapeutic methods.

➡ For those of you who missed that great **MORA Nova training seminar/workshop in St. Louis, MO in June 2013**, high quality professional video recordings of some of the sessions are now available. The guest instructor was **Nuno Ruivo, DO** from Med-Tronik, Germany who is a long time MORA user and one of the technology and software developers of the Nova device. Order the 5 DVDs for \$100 and then deduct it from your MORA Nova order.

➡ As a non-profit organization dedicated to the expansion of Biological Medicine in North America through research, publication, seminar/workshops and sponsorships, we are solely and completely reliant on your support in order to continue our efforts. There is neither government funding nor any outside sponsorships. So, here are a few ways in which you can support Occidental Institute as we move forward in 2014:

- 1) Consider making a \$35 tax deductible donation to OIRF for the newsletter (even though we are offering it freely)
- 2) Be sure that you have purchased copies of the many educational printed and electronic publications and the audio/video training presentations available exclusively through OIRF
- 3) Plan now to attend the various smaller training seminar/workshops sponsored by OIRF to learn more about these methods
- 4) Incorporate sale of the smaller OIRF recommended devices (such as the Medisend Protect, MECOS, the "Little Ludwigs", the AQA 707 water regeneration device, and so on) to your patients – talk to Elaine or Carolyn for quantity discount pricing.
- 5) Make this the year you travel to Germany with us to see Medicine Week
- 6) Consider which of the various devices and methods recommended by OIRF will work in **your** practice and make this the year that you add one or more of them into your office
- 7) Plan to attend the various conferences and conventions where OIRF will sponsor an exhibit booth. This is another opportunity for you to see these methods in action and talk to us personally about how you can incorporate our recommended methods into your practice.

Your donation or contribution will be gratefully accepted and a tax deductible receipt will be issued. We thank you for your support and look forward to working with each of you during the coming year.

➡ For a complete [listing of OIRF resource materials](#), including publications, reports, books and videos please follow this link to our website. There are full descriptions of all printed and recorded materials online.

➡ For a complete [listing of OIRF recommended instrumentation](#), including diagnostic, therapeutic and BioResonance devices please follow this link to our website. There are full descriptions of all instrumentation online.

➡ **Updates, Reminders and Announcements:**

➤ Follow this link to the [Germany Tour Report](#) to join us and share some of our adventures and activities from our 2013 tour program. Dates for this year's Tour #41 are October 28 through November 3, 2014 (including the Baden-Baden Medicine Week Congress).

➤ Watch for Volume 10, Issue #7 of the "The Bridge" newsletter to arrive in your Inbox around mid-July. That issue will feature another great article that Carolyn has translated from one of the German Journals entitled *Color-Energy-Therapy, Energetic principles of Light and Color*. Included are correlations of the colors to Dinshah's color qualities, meridians and the time clock, chakras and balancing points. Watch for this Issue to publish around the middle of July.

➤ Visit our **Facebook** page – will you be our friend?

I trust you have found much of interest in these pages. We look forward to meeting you during our 2014 activities and programs. As always your comments are welcome. Remember that this is your newsletter – your suggestions, article contributions, critiques, FAQ's and compliments – are gratefully accepted.

Yours in health,

*Carolyn*
