THE BRIDGE

Linking Practitioners of German Biological Medicine

Volume 12, Issue #10, October 2016

Tuesday, 18 October 2016

Dear Colleagues, Friends and Supporters of OIRF,

➤ **Welcome to Volume 12, Issue #10 of "The Bridge" newsletter!**

Here is the long promised article by **Jens Tesmer, DSc** called "*BioResonance according to Dr. Cornelissen in the Diagnostics of Dementia*". With all the recent seminars, webinars and publications regarding the ongoing and growing crisis of dementia in the aging, this article is ground breaking and timely. I look forward to hearing your comments and experiences in regard to this information!

➤ We are going to miss seeing you in Germany! Those of you who have not completed their registration for this 43rd Biological Medicine Group Tour to Germany have simply "missed the boat" (or the airplane) to participate in one of the best and most exceptional tour programs I've been able to arrange in many years. The combination of the 50th Anniversary at the famous Medicine Week Congress in Baden-Baden along with our exclusive lineup of speakers and presenters makes this a tour program for the history books.

Although a smaller group than we had initially anticipated, we have a very elite and professional group of international practitioners joining us. Note that although the OIRF offices will remain open during regular office hours, I (Carolyn) will be out of the office from 19 October through 7 November 2016 to host this tour program. Perhaps we will see you next year?

➤ **Advance Notice:** Rumor has it that **Dr. Simon Yu** of **Prevention and Healing** in St. Louis, Missouri is planning two more hands-on AMA (EAV) workshops for MD's next year (possibly March and June 2017). Also, his colleague Mr. Lodholz has agreed to assist with arrangements for "just one more" international conference. Tentative dates for this always exceptional and highly recommended conference are **Sept. 29 to Oct. 1, 2017**. OIRF will be there! Plan even now to attend.

➡ You've peaked at it, you've read about it and you've seen the full information on the **UBS 315** device from **Medical Electronics** (Mr. *Dieter Jossner* of BioPhoton Therapy fame!). These interesting little devices have been "selling like hotcakes" and we find that once you've tried it once, you want more of them.

This small piece of innovative technology will revitalize regular water. It's not a filter, but the change in the quality of the water is immediately apparent. We saw this device demonstrated during our 2015 tour program. Mr. Jossner did darkfield on two of our participants, got them to drink some of the revitalized water, and then about 20 minutes later did another darkfield. This was not just interesting – it was incredibly impressive. So, here's the link to the recently published information about the [Ultra-compact Bioenergetic Stimulator UBS 315](#). Order today for quick delivery – get yours on your desk today!

➡ If you also missed the **ACIM Cancer Conference in Orlando, Florida, Sept. 22-25, 2016**, you missed a good one. There was a long list of highly respected and well known practitioners and researchers updating us on the latest research and information on the complementary/ biological diagnosis and treatment of cancer. I understand that you may be able to download some of these lectures by going to their website (?) and recommend that you get onto their mailing and information lists for announcements of future seminars and conferences.

Two of our OIRF Medical Advisors (*Dr. Simon Yu* and *Dr. Dan Beilin*) were among the speakers and gave excellent presentations. Interestingly many of the main speakers were aware of OIRF and/or have been on our lists for many years – it was very good to see, speak to and meet again so many long time supporters and new friends. Carolyn did so many MORA Nova demos and talked to so many docs that she came home with almost no voice left! Follow this [Cancer Conference](#) link for contact information for this organization. Many thanks to Dr. Cowden, Dr. Beilin and Dr. Yu for their support during this conference.

➡ **Special Mention:**

➤ **Focus on MORA®**, Focus on Health! April 2016

[Download here](#)

- Recognized worldwide: Education and Training at the MORA® Academy
- Migraine, by Elizabeth Kazakov and Andrey Nikitinsky
- Tourette's Syndrome, by Elizabeth Kazakov and Andrey Nikitinsky

➤ **MORA® im Fokus**, Gesundheit auf den Punkt gebracht. Juli 2016 (German Version)

[Hier geht es zum Download](#)

WEBINARS FROM MED-TRONIK!

Every two (2) weeks, Med-Tronik will be conducting a webinar on various subjects with application and function of the MORA[®] Nova. Each webinar will be approximately 30 minutes in length and will be in both German and English.

Click here for the German webinars: <http://www.med-tronik.de/academy/webinare.html>

And here for the English webinars: <http://www.med-tronik.de/en/academy/webinars.html>

Simply press the Register button and sign up. You will be sent a confirmation email, as well as a reminder closer to the date.

This is a terrific opportunity for you to receive ongoing education featuring some of the best and most famous instructors from Med-Tronik including **Dr. Nuno Ruivo**, **Dr. Peter Mahr** and even occasionally **Dr. Gottfried Cornelissen**. If the times don't work for you, don't worry, Med-Tronik will be archiving them so you can watch at your own convenience (or time zone).

Depending on time available, there may even be time at the end for a brief Q & A.

We look forward to you taking advantage of this terrific opportunity to get training on a regular basis. More topics will be available as time permits.

Be sure to save this to your "favorites" and join in regularly.

➡ I invite all of you to maintain your email or print subscription to "The Bridge" newsletter. All 2016 issues of "The Bridge" will be sent to you by email and then published on our website. **Access is open to all**. Follow this link to get your PDF print copy of "The Bridge" Volume 12, Issue #10.

Further new and cutting edge articles from our prestigious Board of Advisors and Directors as well as more of Carolyn's translations of articles from current German journals are underway for future Volume #12 issues of this newsletter.

*An exclusive **article for OIRF Supporters**, published October 2016

Dementia

BioResonance According to Dr. Cornelissen in the Diagnostics Of Dementia

By Gottfried Cornelissen, DMD and Jens Tesmer, DSc

From an article in Naturheilkunde, July 2016

**Machine Translation by SYSTRAN, Lernout & Hauspie, LogoMedia & Prompt
Translation & redaction by: Carolyn L. Winsor, OIRF**

© Copyright 2016, Cornelissen and Tesmer, Med-Tronik, Friesenheim, Germany

According to Dr. Cornelissen (1) most dementia illnesses as well as most heart, circulation and cancer illnesses constitute civilization related illnesses. Therefore the main causes of dementias are chemical and/or physical burdens on the organs through the environment or food, and a stress related overloading of the endogenic, physiological regularization systems. These factors lead to metabolic dysbalances and subsequently to degenerative damages. Genetic risk factors merely favor the illness. Exceptions for example are familial Alzheimer dementia, which clearly starts earlier than the much more frequent, sporadic Alzheimer dementia and with which genetic factors play a big role.

Under dementia, lengthy persistent disturbances of cognitive functions in particular memories with otherwise consciousness-clear persons are to be understood. The most frequent forms of dementia are degenerative dementias, and here Alzheimer dementia is the most important. The second most important form is vascular, circulatory related dementias (2).

What importance metabolic dysbalances, life style and environmental toxins have on the origin or the regulation of the early stages of dementia is shown in an actual case study from the University of California (3).

A comprehensive lifestyle and nutrition changeover with sufficient sleep, movement and supplementation of essential materials proved well suited for therapy. In the study from them it is assumed that the combination of several factors in the functional network of the illness events showed a more positive effect than only individual ones. After 3 to 6 months there came an improvement with 9 out of 10 participants with regard to their memory performance. Only one patient in a very late Alzheimer stage did not react to the measures. Six participants had given up their jobs on account of declining memory, or at least had problems with their job. After the treatment everybody was able to work again or to improve their job.

The therapeutic measures in the study included:

- A diet with anti-inflammatory food, simple carbohydrates and avoiding a late dinner
- Insulin monitoring
- Stress reducing exercises, sports
- Mental training
- Reduction of the homocysteine levels with among other things methylcobalamine
- A dose of Vitamin B₁₂
- Balancing of the levels of the different hormones
- Reduction of the amyloid plaques, e.g. with curcuma
- Supplementation with vitamin D₃ and K₂
- Supply of structural components for the formation of synapses, like e.g. CDP-choline and dehydroascorbic acid (DHA)
- Optimization of the antioxidants and the zinc-copper relationship
- Guarantee of sufficient respiration/oxygen supply during the nighttime sleep
- The optimization of the function of the mitochondria, among other things with Coenzyme Q₁₀
- Supply of pantothenic acid for acetylcholine synthesis
- Exclusion of heavy metal toxins, and
- A dose of medium-chain triglycerides.

Ketones as an Alternative Energy Source

Medium-chain triglycerides are water soluble and without any help from the bilious acid and the pancreas lipase in the digestive system reach directly through the portal vein system to the liver, where they are increasingly metabolized into ketone bodies (4). Ketone bodies can replace glucose as energy carriers in the brain, because often glucose utilization in the brain is damaged very early with dementia, depending on the brain region and the genesis of the dementia (5). With smooth-running ketone bodies the brain receives an alternative energy source for glucose, which moreover is especially energy rich.

A study with a special ketogenic substance (a composition of glycerin and caprylic acid, the latter component in coconut oil: a medium-chain triglyceride) supports this theory. However the effect was rather weak with this mixture (6). By contrast the results of Mary T. Newport were impressive. She gave her husband who suffered from Alzheimer several tablespoons of coconut oil in his food and after 37 days astonishing progress had already been made. Now for example he could outline the dial of a clock (► Figure 1-3) which was not possible for him before (7, 8). Although here this is only about one single case example, something speaks in favor of it (3, 9) that with nutrition with medium-chain triglycerides various positive effects are to be expected on the course of a dementia.

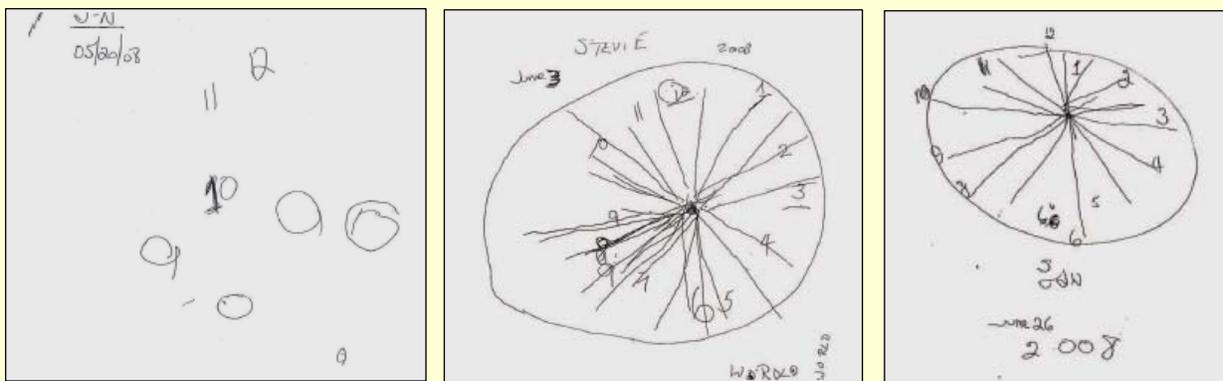

Figure 1-3: The American physician, Mary T. Newport had her husband [who was] ill with dementia draw out the dial of a clock from memory – a widely used test to determine the severity degree of a dementia. The illustration makes clear that for him the Ketone Cure showed an astonishing effect. Left: One day before the beginning of the therapy. Center: After the first two weeks. Right: after 37 days taking the coconut oil. © VAK Verlags GmbH

Besides medium-chain triglycerides other alternative energy carriers than glucose are also promising candidates to supply the brain. **Galactose**, for example can be taken by insulin dependent [*patients*] and in a method independent of insulin in the cells (liver, brain, muscle). As a result, after the metabolization of galactose (in comparison to glucose) nitrogen-containing amino acids occur whose production especially promotes the reduction of ammonia. At the same time with this the highly toxic ammonia is decontaminated from the brain (10). Clinical studies for galactose and dementia in people are apparently still absent.

Causes of Dementia

Now let us look at the most important specific burdens which according to Dr. Cornelissen can be considered as the cause of dementia, and which lead in particular to a longer continuing effect for indirect or direct damage to the brain (1):

Medium-chained triglycerides contained in coconut oil can be used in certain cases for alternative energy production in the brain.

Faulty Nutrition

Faulty nutrition displaces the natural intestinal flora. Increased growth of Candida-yeast-fungi occurs which forms the toxic **acetaldehyde**. Acetaldehyde, which the body cannot sufficiently eliminate or neutralize, burdens the brain in particular in the Corpus callosum, responsible for the integration of the left and right brain hemispheres as well as the coordination of the emotions and understanding.

A longer sustained Candida burden is accompanied on a continuing basis by decomposed flora (leading group Clostridium), which again generates **ammonia** in excess as a byproduct, which is likewise toxic in the brain and in particular has an effect here in the Hippocampus. According to Dr. Cornelissen ammonia is a high promoter of aging dementia.

Cortisol

The hormone cortisol from the adrenal gland is a typical stress hormone. It activates catabolic metabolism processes and thereby makes glucose available for the body in sufficient amounts from the reserves of the organism. The main cause of prolonged increased cortisol values is chronic stress. With older people who suffer from dementia cortisol is often found raised. Continuously raised cortisol values above all damage the Hippocampus, which in particular possesses many receptors for this hormone. The Hippocampus plays a special role in the genesis of dementia because it represents the interface between short term memory and long term memory.

Arteriosclerosis

Deposits and constrictions in the brain arteries, as they especially appear with vascular dementia, result among other things in a poor supply of glucose in the brain cells. The energy is missing for all necessary nervous functions, thus also the energy for formation of the important neurotransmitter **acetylcholine** which is then produced in a small quantity.

Gluten Intolerance

With a gluten intolerance the grain protein can be taken in with the nutrition which passes the intestinal wall and reaches into the central nervous system through the blood/brain barrier where it results in allergeo-toxic reactions which express themselves in different psychosomatic disturbances. On the other hand milk protein is rather unobtrusive.

Environmental Pollutants

According to the experiential values of Dr. Cornelissen there are no dementias without a clear burden through environmental toxins. Organic connections (e.g. PCP, PCB, DDT, formaldehyde, methanol) belong to the neurotoxically relevant environmental toxins. In addition heavy metals play a role which make the blood/brain barrier coarsely meshed and thus generally more permeable for toxins. Important toxic heavy metals in the order with respect to the relevance of their significance are: cadmium, lead, arsenic and mercury.

Therefore to sum up, it should be emphasized that all dementia relevant substances (acetaldehyde, ammonia, cortisol and acetylcholine) can be recorded with the MORA[®] System. Also included in the MORA[®] test system are the important brain areas like the Hippocampus, Lobus frontalis and Lobus temporalis.

Diagnosis with MORA[®] BioResonance

For diagnosis the relevant burdens are identified non-invasively through the MORA[®] BioResonance according to Dr. Cornelissen. With the burdens it concerns a two way choice about the noxae, which critical concentrations are surpassed or are too little, as well as too many essential substances, like for example nutrients, minerals, vitamins or hormones. Moreover all brain areas are tested for their degenerative state. As a special feature of the MORA[®] BioResonance the burden can be associated (filtered) with the relevant brain area. In addition the strength (importance) of the burden is measured, from which the therapy is derived and which begins in each case with the strongest burden. A diagnosis and therapy with regard to dementia should always be preceded by a MORA[®] System Diagnostic for the recording of the total condition of the organism. Important steps of the MORA[®] Dementia Diagnosis and Therapy (1) are:

All **brain areas** are tested as far as their degenerative state. For example, for Alzheimer illness the medial areas of the temporal lobes (Hippocampus and entorhinal cortex, deep inside behind the ear) are injured first. A corresponding symptom is the disturbance of the transition of short term memories into long term memory. Furthermore special attention is given to the temporal lobe and the frontal lobe of the cerebrum. Disturbances in these sectors influence associative as well as causal thinking.

A deficiency of the important neurotransmitter for stimuli transmission, the **acetylcholine** shows as a burden first in the sectors of the Hippocampus, temporal lobe and frontal lobe. As well it can be tested on the preliminary stage of the acetylcholine, the dimethylaminoethanol (DMAE). The substitution of acetylcholine over this preliminary stage presents itself as a therapy.

A marker for a burden of the vessels is raised **homocysteine levels** which among other things produce malnutrition, if there are certain vitamins (B₁₂, B₆ and B₉) lacking. The result is vascular damage which limits the supply of nerve cells through the inhibition of the cerebral blood circulation. Homocysteine has an effect directly on the neurotoxic and neurodegenerative and is accompanied by psychic symptoms like restlessness, discontent and depression. Here we either test the deficiency indirectly on the corresponding vitamins or directly with the homocysteine preparation, in that we filter the homocysteine tested as a burden over the also positively tested brain arteries. In addition the problem-relevant B vitamins are quantified on the basis of deficiency and accordingly substituted together with SAM (S-adenosylmethionine). Nevertheless it should be considered that vitamin B resorption suffers with an intestinal dysbiosis.

All neuro-infectious illnesses should be excluded as a cause of the dementia. **Viruses and bacteria** (e.g. Borrelia) are determined in the [cerebrospinal] fluid through the corresponding resonance with the technology of the correlation test. Viruses can be treated very well with the MORA[®] BioResonance.

The toxic **acetaldehyde** from a burdened intestine has an especially serious effect on the Corpus callosum which integrates both hemispheres (Emotio and Ratio – emotion and rationality). Accordingly this burden is filtered on all brain areas with special attention to the Corpus callosum.

Toxic ammonia from a burdened intestine has an unspecific effect on the whole brain, however the Hippocampus is particularly affected. With dementias with a high ammonia burden the glutamine synthesis is not sufficient. In the brain the glutamic acid detoxifies the ammonia while it is converted by it into glutamine (see galactose above). At the same time arginine is tested in deficiency in the patient. Low glutamic acid values and high ammonia values in the brain can be well tackled with the preparations arginine, glutamine and ornithine-aspartate. The cause of the increased ammonia burden from the intestine should also be treated.

Typical **microinflammations**, as they appear with all important chronic inflammation illnesses, can be identified while the positively tested brain areas are filtered over arachidonic acid. The most important substances against microinflammations in the brain are Omega-3 fatty acids (with a high proportion of DHA), Alpha lipoic acid and

Coenzyme Q₁₀. With dementia after inflammation illnesses, the intestine should additionally be searched. The intestine is in connection with the brain through the nerve fibers. Thus inflammation processes in the intestine also have an effect on the brain.

As further possible burdens for dementia only the burdens of the environment are mentioned here. Especially important **E-Smog** comes up here, which has an effect on the epiphysis and melatonin is degraded. Testing malondialdehyde has turned out as the general indication to the burden through environmental toxins. Thus if the quantification exceeds a value of V=500 a treatment-deserving environmental burden is present, whose therapy consists of a specific detoxification.

Therapy According to Dr. Cornelissen

The MORA[®] Therapy for dementia according to Dr. Cornelissen always consists of a supplementation of the required materials and/or their preliminary stages known to be in deficiency. Further support with problems of the brain being in connection with the organs is treating causally like for example the intestine. In addition suitable medication against the different forms of dementia can be individually tested. An amplification of over 20, obtained with the efficiency measurement characterizes a good medication, over 40 is excellent. The special advantage of MORA[®] BioResonance Diagnostic according to Dr. Cornelissen lies in the individual customized to the patient testing of all burdens and with that the inclusion of the important key factors of the illness events. The patient receives a “tailor-made” therapy plan. Nevertheless, the earlier the therapy is begun, the greater are the chances to already recognize and to regulate present dysbalances in the cerebral metabolism before each morphological change in the brain, and thus to avoid substantial morphological failures.

The rare disease of Auguste D.

A little more than 100 years ago, on the 19th of December, 1915, **Alois Alzheimer** died, the discoverer of Alzheimer's, a disease named after him. As one of the few doctors of his time, he searched for the core of the disease, which was so far seen as a purely mental problem.

Disoriented, confused, uncontrolled and caught between emotional extremes - in this condition **Auguste Deter** was taken to the municipal asylum for lunatics and epileptics in Frankfurt by her in the meantime fully overstretched husband on the 25th of November, 1901. He could neither understand nor prevent that his wife Auguste had changed significantly for approx. half a year: She had recently been hiding things in her own house, without any reason, bothering the neighborhood, suffering from absurd jealousy and fear of acquaintances. Furthermore she could hardly get by in everyday life and had more and more serious memory problems.

Auguste Deter, 1850-1906

Not only the symptoms per se raised questions. These are often well-known unavoidable complaints of old age. What was extraordinary is that Auguste Deter was not yet 70 or 80, but only 51.

Someone that was particularly interested in this fact was the medical assistant Alois Alzheimer. He concerned himself intensively with the patient and kept extensive and detailed records of her condition. One day after her admission the following dialogue, which meanwhile gained notoriety, took place and showed in its simplicity very pointedly the helplessness of the patient.

Sits up in bed with a puzzled facial expression.

What's your name?

“Auguste.”

Last name?

“Auguste.”

What's your husband's name?

“I think Auguste.”

Your husband?

“Yes so my husband” (*apparently did not understand the question.*)

Are you married?

“Yes Auguste.”

“How long have you been here for?” (Seems to delve into herself)

“3 weeks.”

“What is this?” (pencil)

“Steel spring.”[1]

After this conversation many others followed and it was clear that Deter became more and more disorientated. Alzheimer confronted her with some calculation tasks, asked her to tell the time or read out a text, continuously asked for her personal data and requested her to write them down. While her answers became more confused, time and again she also lost control over her behavior. Periods of anxiety alternated with periods of passivity as well as restlessness. In these periods she walked through the clinic and touched other patients' faces, even hitting them, and as a result got hit too. At that time the motives of her actions were completely inscrutable – for outsiders as well as for herself. In one of the conversations she concluded: “I lost myself, so to speak” [2]. It could not have been described more appropriate. Also statements like “I'm so wrong – so wrong” [3], give us a vague idea that her own life at this time must have felt like an incomprehensible labyrinth to Deter.

Auguste Deter died on the 8th of April, 1906. The news of her death also reached Alzheimer, who in the meantime worked in Munich, but had always maintained contact with Frankfurt. He claimed his former patient's brain and dissected it. In the process he discovered the protein deposits, nowadays called plaques, destroyed fibres and the depletion of brain cells.

The diagnosis before section, as shown in the clinical report, stated “Plain disturbance of the soul” [4]. Alzheimer knew that he could not be content with this and therefore presented the findings of his observations and the investigation of the brain to other doctors on the 3rd of November, 1906. Platform for this was the 37th conference of South West German psychiatrists in Tübingen.

To his great disappointment his lecture on *A rare disease of the cerebral cortex* did not receive any attention. With a focus on the entourage of the psychoanalyst **Sigmund Freud**, to be precise on his then comrade **C.G. Jung**, Alzheimer's lecture did not give rise to any questions.

Alzheimer himself died, at the age of 51, in 1915. The full recognition of his research on the disease of Auguste Deter was granted only many years later.

About Dr. Cornelissen:

Dr. med. dent. Gottfried Cornelissen is a dentist and expert in natural healing methods with his own natural healing practice in Rostock-Warnemünde. Since 1988 he has employed MORA[®]-Therapy. Since 1993 he is a lecturer for biophysical medicine and since 1997 also an international lecturer and speaker for MORA[®]-Therapy. He has published numerous books and articles in the technical literature. Additionally he developed the so called System Diagnostics as a holistic test program. At the present his noteworthy cancer diagnostics and therapy have found great resonance.

The Author:

Jens Tesmer, DSc, Dipl. Biology, has worked as a freelance biologist since 2013 and does research within this scope among others as a guest scientist at the Technical University of Hamburg as well as for Med-Tronik GmbH in Friesenheim. Previously he was employed as a scientific coworker in various research facilities of the University of Greifswald and finally the Max-Planck Institute for Dynamics of Complex Technical Systems in Magdeburg. The focus of his work lies in the meaning of water for health and the effect of electromagnetic fields on the organism.

Translator's Notes:

[1] Ground Regulation System:

- **A special report** with accurate English translation of a series of seven German language articles initially published by **Prof. Dr. Heine** in 2011. Total of 48 pages with information that is mandatory reading for all practitioners of orthodox and complementary medicine. Available from OIRF in electronic (PDF) or print formats for \$30.
- Also see the **book**: *The Extracellular Matrix and Ground Regulation, Basis for a Holistic Biological Medicine*; By Alfred Pischinger and Hartmut Heine (available in English on Amazon)

Translator's Notes (continued):

[2] In my ongoing efforts with the translation work I do for OIRF, it is my goal – my standard – to give you the exact words and meaning of the German author. In other words I consider myself as a translator, and not as an interpreter who would insert their own opinion or “interpretation” to what was said in German. In this article Dr. Cornelissen made a very clear distinction between what he considers a “disturbance” as opposed to a “burden” or “stress” factor. In all cases I have translated his use of each word exactly.

There is a very real difference here in that there can be a “disturbance (field)” in the body (even internally generated), whereas a “burden” or “stress” in this context is primarily an external influence that can or does create a disturbance. The usual translation in the literature tends to haphazardly interchange these terms, but for this article (even though it sometimes doesn't “read” right in English) I have carefully preserved an exact translation so that you can see **Dr. Cornelissen's** meaning. Here the word burden is primarily used in the sense of an external factor which is stressing, polluting or (over)burdening the body. CLW

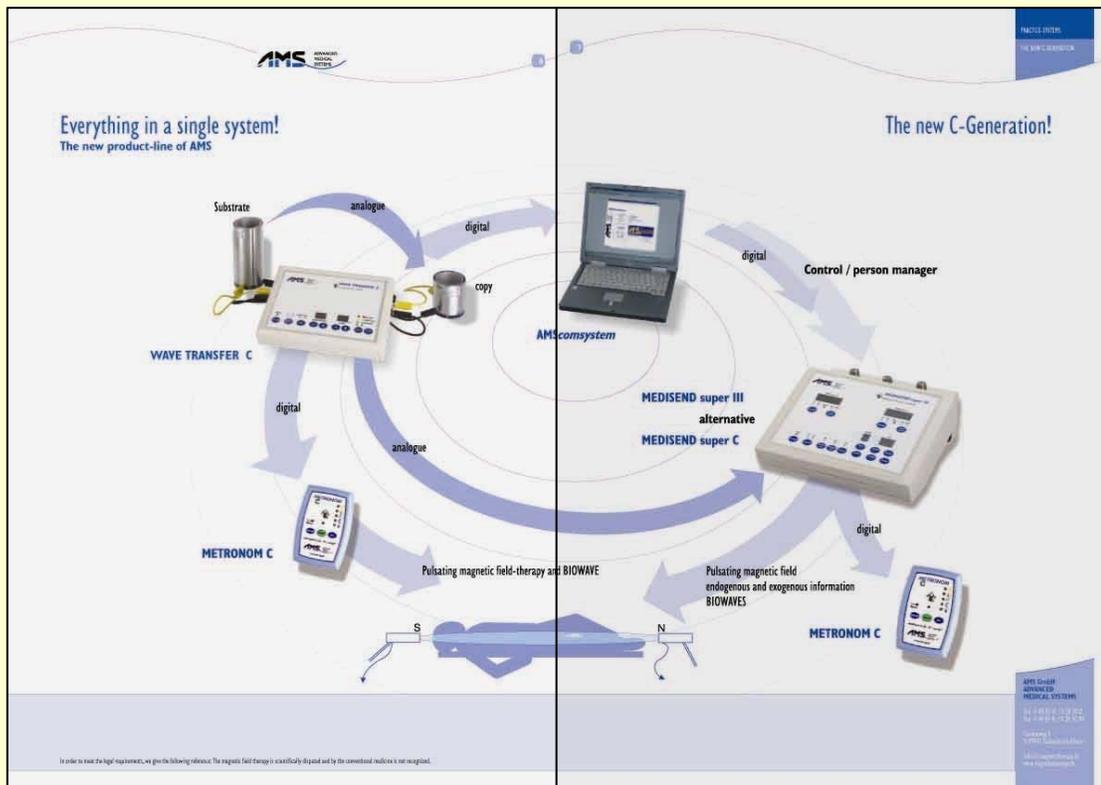

Scenes from previous tours – we'll miss having you join us this year.!

Practice Application:

**ADVANCED MEDICAL SYSTEMS –
Everything in a single system!
Pulsed Electro-Magnetic Field Therapy**

Medisend Super C: Pulsating magnetic field, regulative medicine, “bio-resonance”, acupuncture, transmission and storage of oscillations.

Medisend Super III: The “luxury liner” model includes everything mentioned above plus many added features including “bio-resonance” and bipolar magnetic output with the use of two directional inductors.

Wave Transfer C: For the transmission and duplication of bio-information in either analog or digital format.

Metronom C: Pocket sized magnetic field device with five programs. Can be “loaded” with bio-information. Ideal for complementary home use.

AMScomsystem: Communication and control platform for the new C-generation of devices – now you can steer “everything in a single system” with this new software. Can be used with all devices designated with the “C”

These devices are all based on the work of **Dr. rer. nat. Wolfgang Ludwig**. Please see the graphic above for a pictorial representation of this phenomenal system.

You can contact **Advanced Medical Systems** directly for full order, pricing and delivery information on their website at:

www.magnetotherapy.de/
Mention OIRF with your order to receive a small discount ($\pm 3\%$).

MEDTRONIK

HOME OF MORA'

MORA[®] NOVA

Vibrations that will change your life!

The MORA[®] BioResonance Method with reliable 2-channel technology

Stimulates self-healing powers and
thus removes disturbances and blockages.

Target group: Physicians, alternative practitioners,
therapists and naturopaths.

TREATMENT

For diagnosis or therapy with MORA[®] NOVA, the patient is connected through hand, foot and head electrodes. The patient's vibrations are sent to the device through the electrodes. Depending on the symptoms and treatment program, the vibrations are converted by MORA[®] NOVA into corresponding therapy frequency patterns and returned to the patient through the output electrodes.

BENEFITS FOR USERS

Today the bio-resonance therapy as an energetic diagnosis and therapy method cannot be wished away from holistic complementary medicine. MORA[®] NOVA offers many options that can cover various therapy fields. It gives you a reliable diagnosis and therapy. The body is thereby supported to regulate itself. Your patients experience a side effect-free therapy, which achieves astounding results for many symptoms and diseases. Often the bio-resonance therapy is helpful in cases where traditional medicine was not adequate.

BENEFITS FOR PATIENTS

- ◆ Often the patient feels an improvement just after the first treatment
- ◆ Therapy is often perceived as very comfortable
- ◆ Treatment is free of side effects and is not at all stressful
- ◆ Short treatment duration (between 5 and 30 minutes)

The MORA® System offers many remarkable possibilities!

MORA®-Diagnostics

The MORA®-Diagnosis and MORA®-Therapy are state of the art medical technology. They use the latest insight of modern biophysics and are scientifically researched and verifiable. The MORA® device has many diagnostic and therapeutic options.

MORA®-Therapy

For 35+ years, the MORA® bio-resonance therapy has been used successfully around the world. This therapy form makes it possible not only to diagnose unhealthy oscillations but also to treat them.

The electromagnetic oscillations are

- ◆ picked up in the patient's body
- ◆ transmitted to the MORA® device
- ◆ inverted by means of electronic amplifiers, and
- ◆ returned to the body

The aim:

To activate the body's self-healing power and to remove disruptions and blockages. The patient's balance is to be restored.

Treatment

Experience has shown that patients find the treatment very pleasant. While the electrodes are being put into place, the patient can relax. The therapy lasts between 5 and 30 minutes. Many patients even experience an improvement after the first treatment.

Side Effects

The patients experience a therapy free from side effects. The practice is not stressful at all. It can be used attendant to any pathology and permits combination with many therapeutic methods. In many diseases astonishing results are achieved.

GUARANTEED QUALITY

Outstanding quality and excellent services!

Quality creates trust!

Constant high quality – that is the primary goal. Only then we can satisfy our customers on long-term basis. After all we are dealing with health here. Therefore the continuous improvement of the internal quality management has a very special focus. Due to this reason all MORA®-Products are manufactured only in Germany. All the working steps – from development to material selection to precision manufacturing – are tightly monitored and controlled. The high quality requirement is documented through following independent audits and certifications.

4 DVD SET NOW AVAILABLE!

MORA BioResonance Therapeutic Possibilities

Getting the BEST out of your MORA Technology

Date: Thursday, September 10, 2015 – COMPLETED! You missed it!

Intended audience: For beginners and advanced MORA® BioResonance users. For whatever model you are using, learn the true BioResonance Therapy applications.

You have the MORA, but how do you get the **best** out of it? This one-day lecture course guides you gently, starting with how to think about the way the MORA works, how to think about your patient's health problems, and how to match the two for optimum treatments.

For beginners, or for those who need a refresher, the basic concepts of classical BioResonance are clarified. Learn how to immediately provide effective treatments even if you don't know what you're doing yet.

As the day progresses, you receive expert guidance on how to tackle the most common underlying problems in health, including candidiasis, influenza, hay fever, food intolerances, "tummy bugs", Lyme disease, dental support, and hormonal issues. You will also learn how to verify that the treatment you've given has already been effective. Cases are presented to provide additional concrete information and summarize the day's information.

Lecture course features **Marguerite Lane, ND** from Australia. She has been in full time private practice since 2002 and has used the MORA Super since 2003. She is specialized in the BioResonance techniques of **Dr. Gottfried Cornelissen** of Germany.

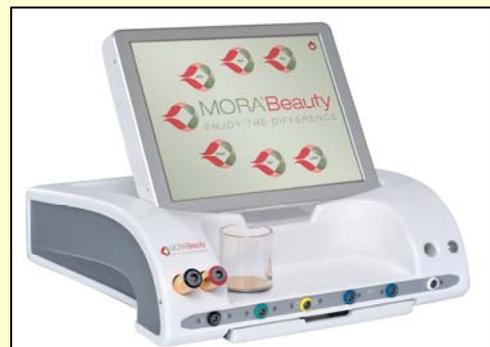

This course was sponsored by **Occidental Institute Research Foundation** and presented in conjunction with the **Gateway Fdn. for Biological & Integrative Medicine** prior to the famous "Curing the Incurables" Conference held in St. Louis, Missouri September 2015.

We encourage you to take advantage of this opportunity to benefit from the therapy application and information presented by this well respected and experienced practitioner. Video was professionally filmed and edited.

Set of 4 DVDs US \$150 plus shipping (available for immediate shipment).

➡ Did you see the Issue #5 Supplement to "The Bridge" newsletter? We included an excellent article that told about the amazing results and effectiveness of this BioResonance device designed for cosmetic applications. Menus and programs are straightforward, and it is intended to be delegable! Follow this link to see the supplementary newsletter article and device details for the remarkable [MORA® Beauty](#).

Videotaped "DIAGNOSTICS" AND "THERAPEUTICS"

Seminar/Workshops by Dr. Walter D. Sturm† of OIRF Staff

* 1944-2004 †

Part One on Diagnostics:

Special Reports:

1) Report on LM Potencies. Translated and prepared by *Dr. Walter D. Sturm* based on the work of *Dr. Samuel Hahnemann*. This is pivotal information for all homeopaths. In the last years of his life Dr. Hahnemann turned solely to the use of LM potencies for his patients instead of the "usual" C and X potencies still utilized today. This knowledge was suppressed for nearly 80 years and revolutionized the practice of homeopathy when that famous 6th edition of his *Organon of Medicine* was finally published. Read the story and see the meticulous research and translation left us by Dr. Sturm. See further information on this [important report](#) at this link. 51 Pages. \$40

2) The Problem of A and Inverted A in Homeopathic Nosodes. Translated and prepared by *Dr. Walter D. Sturm* based on the research of *Gottfried Cornelissen, DMD*. Advanced BioResonance information. 4 Pages. \$5

3) A Critical Examination of Current EAV-Diagnosis, the Mebe-Ampule and Filter Procedure. Translated and prepared by *Dr. Walter D. Sturm* based on the research of *Gottfried Cornelissen, DMD*. Digital single oint mwasurement according to Dr. Cornelissen. Advanced BioResonance and EAV-Diagnostic information. 14 Pages. \$10

4) The Genital System. Translated by Carolyn L. Winsor; revised and edited by *Sean Christian Marshall, DSc* based on the work and research of *Jean-Claude Darras, MD*. Advanced traditional acupuncture information explaining the energetics of the genital system including disorders and treatment. 23 Pages. \$25

A New Report

The Ground Regulation System (GRS)

By o. Univ.Prof. Dr.rer.nat. med.habil. Hartmut Heine

A few years after his serious illness in 2011 **Prof. Dr. Hartmut Heine** published a series of seven articles on the **Ground Regulation System**. I [*Carolyn Winsor*] was honored to be able to translate this incredible research into English for the first time and to publish it in our newsletter, "The Bridge".

As I worked my way through translation of the first article, the wealth of knowledge and understanding imparted in even that introductory article left me scrambling for dictionaries, research documents hidden away in the old OIRF library and way beyond "Google searches" to make sure that I was doing justice to the information Prof. Dr. Heine was imparting. Combined with the succeeding six further articles, his gift to us of knowledge and of understanding is truly priceless.

In respect for Prof. Heine I have merged those seven articles into one single report and have republished it separate from that older newsletter. With a total of 48 (mind-blowing) pages, this work is not just "worthwhile" reading, but mandatory reading for all practitioners of orthodox and complementary medicine. Available in electronic or print format for \$30, here is an outline of the contents:

- Part 1** – The Ground Regulation [A History and Background]
- Part 2** – GRS as a non-linear system – Structure, function and determined chaos
- Part 3** – GRS as a non-linear system– Structural components of the extracellular matrix (ECM)
- Part 4** – Spatial structure of the ECM and material transport within the system
- Part 5** – Contact, limitation and clogging up: Cell adhesion, basal membrane and glycosylation
- Part 6** – Functional relations of the ground regulation with the central nervous system
- Part 7** – The Ground Regulation and the Circadian Rhythm
 - The Ground Regulation and Alzheimer Dementia

And don't forget to order your copy of:

The OIRF Special Report On Medication Testing

A translation of Dr. Kramer's full medication testing guidelines from beginning to highly advanced aspects. Dr. Kramer has given us the most complete, step-by-step guidelines for learning medication testing on your own. Based on his seventeen years of practice and teaching, he also suggests the preparations you need to get started. Recommendations on how to order a set of those preparations for yourself are included within the report, and most are now included within the Electronic Remedy Test Sets Software. If you follow all of the report instructions, you will learn how to do medication testing by yourself, easily, quickly and correctly. If not, something is wrong with your Electro-Acupuncture instrument – not you!

This SPECIAL REPORT available in electronic or printed format for \$30.00
(Report is over fifty pages. Preparations are not included.)

➤ **OIRF Resource Materials:**

- For more information and instruction about point and medication testing with EAV see the OIRF: [Medication Testing Report](#) and the [EAV Desk Reference Manuals](#) (both available on disc).
- For more information and instruction about [Diagnostic and Therapeutic Techniques in Biological Medicine](#) with emphasis on BioResonance Therapy be sure to order the recently re-released videos of Dr. Walter Sturm's seminars.
- For a complete [listing of OIRF resource materials](#), including publications, reports, books and videos please follow this link to our website. There are full descriptions of all printed and recorded materials online.
- For a complete [listing of OIRF recommended instrumentation](#), including diagnostic, therapeutic and BioResonance devices please follow this link to our website. There are full descriptions of all instrumentation online.
- Of the three full "home-study" or "extension training" programs developed by Occidental Institute, two have been fully updated and are available in PDF format on disc. Research and publication of each of those programs has been pivotal in the development and application of Acupuncture and Biological Medicine in North America and around the world. Be sure to obtain your copies of these famous and well respected volumes for your library and study purposes.
 - Modern & Traditional Acupuncture: \$165
 - Master of Acupuncture Program: Translations of the ancient acupuncture classics (The Nei Ching consisting of the Su Wen and Ling Shu, as well as the "Difficult Classic" the Nan Ching) are still available in printed format – \$125
 - EAV Desk Reference Manuals, Parts 1 & 2 – \$200
 - Diagnostics and Therapeutics Seminars of Dr. Sturm – \$200

Get more details at <http://www.oirf.com/resources.html>

"EXTENSION TRAINING" PROGRAM IN MODERN & TRADITIONAL ACUPUNCTURE

Over twelve hundred pages of printed materials incorporating applicable materials from the supplementary textbook ([An Outline of Chinese Acupuncture](#)) and set of four charts (by [China Cultural Corp.](#)). Program starts off assuming you know nothing about acupuncture (a good place to start even if only as a thorough review of the basics) and takes you right through to the most heavy-duty advanced aspects of true, 'energetical' acupuncture. The finest and most comprehensive material in the English language, covers all seventy-one meridians of traditional acupuncture; that 'missing sixty percent' of acupuncture knowledge most "acupuncturists" have never even heard of; and, the modern electronic 'needle-less' treatment methods (Electro-Acupoint Therapy) now so popular.

Over 3,000 students were originally enrolled in this famous Extension Training Program, and the OICS graduate listings read like a "Who's Who of Acupuncture" in the English speaking world. This program takes you as far as anyone possibly can in a 'written' format prior to the clinical finesse and practicum needed to round out your acupuncture study to professional levels.

FULL THIRTY-THREE LESSON PROGRAM NOW AVAILABLE ON DVD

Price includes disc with all 33 Lessons, applicable supplementary textbook (An Outline of Chinese Acupuncture) passages and representation of set of acupuncture charts (China Cultural Corporation set of four). [Current editions of the textbook and charts can be easily obtained from suppliers of acupuncture books and supplies.] Price does **not** include printed materials, binders; or, any tutorial, examination, or certification privileges. Follow above link for full details. **Full set on one disc available for CDN \$165.**

Calendar of 2017 Events!

➡ **Conferences and Conventions:** As an ongoing approach to bring this information and education to a broader range of practitioners, OIRF will sponsor speakers and lecturers in a number of conferences and events throughout the USA, Canada and Germany, and we are looking forward to an exciting and busy fall season.

Plans and registrations for OIRF to be present at a number of important conferences throughout the US, Canada and Germany have been arranged, and we are looking forward to an exciting and busy year. It is our hope that you will join us in our efforts to expand the use and knowledge of Biological Medicine in Canada, the USA and around the English speaking world.

Here are **some** of the events where our OIRF Board of Directors and Advisors are giving presentations and participating. Be sure to check out the announcements of events and conferences enclosed and on the [Calendar of Events](#) on our website. Make plans **today** for which events you will attend during 2016 and 2017. Your support for the organizers is greatly appreciated, and gives you the return of fascinating, informative and educational programs that will enhance your practice – and CEU's! OIRF directors, advisors and/or members are active in each of the recommended events. See Pages 18-19 and 22-24 for further details.

➤ **Acupuncture Meridian Assessment Training** for MD, DO and DDS. Primary focus is teaching medical practitioners how to check a few essential acupuncture points to look for disturbances which might be an indication of parasites or dental problems. This training covers many clinical case histories that will amaze you with the healing results that occur where prior numerous doctors and specialists failed to succeed. Class consists of lectures and lots of hands on "boot camp" drills for 2½ days held in **St. Louis, Missouri March 24-26 and June 23-25, 2017**. Sponsored by **Dr. Simon Yu** and also featuring **Dr. Robert Cass, Dr. Doug Cook, Gordon Johnston** and **Carolyn Winsor**. To register contact Kate, Office Manager at 314-432-7802 or [Prevention and Healing](#)

➤ **Advance Notice:** Dr. Simon Yu's colleague Mr. Richard Lodholz has agreed to assist with arrangements for "just one more" international conference. Tentative dates for this always exceptional and highly recommended conference are **Sept. 29 to Oct. 1, 2017**. OIRF will be there! Plan even now to attend.

➤ **50th Anniversary Medicine Week Congress**, Oct. 28 through Nov. 1, 2016 in Baden-Baden, Germany with OIRF Advisors, Directors and Germany Tour participants attending. Usually more than 3,000 doctors participate with nearly 200 lectures, workshops and courses (German and English language). The main theme for 2016 is "*Experience and Science: Diagnosis and Treatment Possibilities with High Practical Relevance*" is mirrored for the OIRF Tour #43. Exhibit area with more than 220 exhibits provides you with an excellent insight into the big product offerings in natural healing and complementary medicine. There you can find out directly, and compare. Contact OIRF for attendance possibilities.

➤ **Biological Medicine Tour #43 to Germany, October 26 through November 1, 2016.** Join us for our **43rd** group tour including the world famous "Medicine Week" Congress in Baden-Baden. Tour program also includes exclusive OIRF English language lectures from renowned German clinicians and researchers as well as pharmacy and clinic visits. Speaker, event and activity schedules have been posted on our website at: www.oirf.com/germany2016.html . Registration for this program is now closed. Hopefully you will be able to join us next year?

➤ As US certifications for the MORA Beauty are finalized, OIRF and Med-Tronik will be sponsoring exhibit areas at a number of conferences throughout the USA and Canada during 2016. Watch for dates and locations to be announced for an opportunity to see this remarkably effective device that can rapidly generate income for your practice.

- See the **MORA Beauty** at **A4M Las Vegas, Nevada on Dec. 9-11, 2016**, Booth 5084

➤ **MORA BioResonance Therapeutic Possibilities**, 1 day course on therapeutic applications with **Marguerite Lane, ND**, Australia. 4 DVD set of video recordings are now available through OIRF for US \$150 plus shipping. [Note: All backorders will ship during the first week of March.]

➤ Follow this link to our website to see Issue #10 in print/PDF format.

➤ **Updates, Reminders and Announcements:**

➤ Again! Register now for the **43rd OIRF Biological Medicine Group tour to Germany for 2016**. This 43rd Germany Tour will take place in conjunction with the **50th Anniversary Medicine Week Congress in Baden-Baden** in Oct/Nov of 2016! Confirmed tour dates are set for Oct. 26 to Nov. 1, 2016.

➤ Watch for Volume 12, Issue #11 of the "The Bridge" newsletter to arrive in your Inbox around mid-September 2016. Additionally, there are a number of new and exceptionally well written articles by Med-Tronik researchers and instructors that have been published in the German CO'Med journal. Carolyn is busily translating as many of them as possible for future newsletter issues. The November Issue will feature one of those translations and possibly a report on the Germany Tour program.

- Visit our **Facebook** page – will you be our friend?

I trust you have found much of interest in these pages. All of our many 2016 events and activities have been fully arranged and finalized, and we are looking forward to participating in numerous conferences while supporting the various speakers and complementary organizations. Additionally there are variety informational articles being prepared for the next Issues of Volume 12 of "The Bridge". Electronic publication with access open to all will continue throughout 2016 and 2017 and we will continue bringing you that cutting edge information for which OIRF is famous.

We look forward to meeting you during our forthcoming 2016 and 2017 activities and programs. As always your comments are welcome. Remember that this is your newsletter. Your suggestions, article contributions, critiques, FAQ's and compliments are gratefully accepted.

Yours in health,

Carolyn
