Dear Colleagues, Friends and Supporters of OIRF,

Today I am pleased to be able to bring you a bonus article in advance of the next Issue of "The Bridge" newsletter. This is a short article from **Prof. Dr. Hendrik Treugut** entitled "*What is Energetic and Information Medicine (Energy Medicine)? – More than a Definition . . .*" Dr. Treugut will be the Keynote Speaker during our forthcoming **43rd Biological Medicine Tour to Germany** and this gives you a nice preview of what he will be presenting. He was anxious to speak to the group again this year as – in his words – "there's so much new information that your group needs to hear!" This lecture will be exclusively presented to our group (it is not a part of the Medicine Week lectures) to give us a clear view of the current research and development within Germany and Europe. You can see a brief intro to Dr. Treugut and his work at the end of this brief article.

There will be a number of additional exclusive lectures as part of this tour program and we will also be participating in a variety of English language lectures which are scheduled as an integral part of the Medicine Week Congress program. In view of the 50th Anniversary celebrations and lectures of the Med-Week Congress combined with our OIRF private Tour program, we are really looking forward to a uniquely informative and educational program. This year we will be joined by a larger than usual number of our Directors and Advisors (some of the "many timers") who are usually willing to share their expertise, advice and guidance during the many opportunities for conversation. Register early to ensure a place on this tour program!

So here is your preview article by Prof. Dr. Treugut, and you can find a PDF print edition here. Will we be meeting you in Frankfurt ???

As a part of Complementary and Alternative Medicine (CAM), Energetic and Information Medicine (*Energy Medicine*) defines itself in its own self image, not as a contrast but rather as a supplement and extension of conventional medicine corresponding to the holistic structure of the human organism.

Thus a medicine is described which uses physical signals for diagnostic and therapeutic purposes instead of biochemical active substances. Among other things biological regulating or controlling electrical currents, electromagnetic waves, acoustic or light signals, torsion waves, different kinds of fields, information entities, but also various body and mental techniques belong to it.

In June 2005 *Energy Medicine* was declared as the fifth largest area (“major area”) within Complementary Medicine by the US-American **National Center for Complementary and Alternative Medicine** (NCCAM) ([www.nccam.nih.gov](http://www.nccam.nih.gov)).

Behind the concept of this holistic nature is the image of the organism as a multidimensional system, according to the laws of System Philosophy (*Ervin Lázsló*) and its perception as a Holon (*Arthur Koestler*). The pivotal point of understanding is the multidimensional structural model of the organism, the existence of the different control and/or regulation levels which are structured hierarchically and in their system-appropriate teamwork prerequisite for health. Within the individual levels a fine adjustment takes place: with positive feedback cybernetic circuits provide for

construction, with negative feedback for stability, for the observance of the dynamic balance between chaos and rigidity, the biochemical homeostasis, etc. The central meaning of energy and information arises from this.

All different models of multidimensionality reveal that conventional medicine limits itself extensively to the physical (structural) level and neither recognizes nor considers the levels of energy, the ethereal or subtle energy of life, the psyche and not really the spirituality. Exactly these areas of the bioenergetic fields and the bioinformation fields, but also the psychic and spiritual levels are the wider field in which *Energy Medicine* offers a large repertoire of diagnostic and therapeutic procedures – among others based on high-tech electronics and IT technology – with barely conceivable new possibilities and success.

The application of *Energy Medicine* means to optimize the system aspect of the organism as an internal structure, and the Holon aspect as its external structure, in order to reach a truly holistic healing.

**Priv.Doz. Dr.med. habil. Hendrik Treugut \*** was the Chief physician (emeritus) of the Radiological Department of the municipal medical center. He has worked in clinics and larger medical centers in Germany and the USA as well as the Universities of Tübingen (Germany) and Lund (Sweden). The main focus of his research is complementary medicine diagnostic procedures and medical frontiers along with international lecture activities. He was instrumental in development and implementation of the Energy Medicine modules within a European Master Study Course. He is a member of the directors of the ISSSEEM (USA) as well as the founder and president of the Deutschen Gesellschaft für Energetische und Informationsmedizin e.V. DGEIM [*German Association for Energetic and Information Medicine, Inc.*].

\* Note from Carolyn: All those initials and credentials up there? Here's a quick "translation" of them: **Priv.-Doz.** = Privatedozent = unsalaried (by a university) associate professor and lecturer; **Dr.med.** of course = MD or Medical Doctor; **habil.** (habilitatus) = a degree showing the holder has done a post doctoral thesis and is qualified for a senior university post; and **emeritus** (em) = retired [from the hospital anyway!]. Well, I'm impressed!
