

Occidental Institute Research Foundation Proudly Presents the 44th Biological Medicine Group Tour to Germany

Join us Thursday, Oct. 26 through Wednesday, Nov. 1, 2017
(Including the Baden-Baden Medicine Week Congress)

Heidelberg Castle

Med-Tronik in Friesenheim

The famous Congress Hall in beautiful Baden-Baden

**A Personal Message from Carolyn L. Winsor,
Managing Director of Occidental Institute**

**WHERE CAN YOU LEARN THE MOST EFFECTIVE AND THE MOST CURRENT
BIOLOGICAL MEDICINE TECHNIQUES FOR YOUR PRACTICE?**

This year, for our **44th Biological Medicine Tour to Germany** we have synthesized the very best elements of our previous 43 tour programs into another comprehensive overview program. Join us to travel into the famous Black Forest in one of the most scenic and beautiful areas of Germany, enjoy private single room accommodations (we'll let the couples share a room!) mostly in smaller family run hotels, excellent menus in award winning restaurants and an educational program of unprecedented quality in our long running tour history.

Shortly after a previous tour our OIRF Medical Research Advisor **Dr. Ted Cole** wrote: *“Carolyn and her staff have produced the longest running and best tour of its kind in existence. Carolyn is an insider of the German Biological Medicine scene, and personally knows all the major researchers and practitioners. She has built these relationships over the years, and is able to get you into places and meet people in a way that no one else is capable of.”* Thanks for your comments Ted, and drawing on that experience we have designed a program that will show you the very best from the past, the very latest in-depth research and innovation, and then inform you how to utilize these techniques and methods in your modern everyday practice.

On the educational-front, many of the lectures are arranged exclusively for participants of this tour. That means private focused training by the leading experts in the world. In many cases, the presenters are the very people who have developed the therapy that they are speaking on. And you have access to these medical experts while getting the information straight from the source!

On the practical-front, do you already have lots of ‘toys’ in your practice? Or, are you just starting into Biological Medicine practice and wondering ‘what is the best place to begin’? Either way, this is the ideal opportunity to see it all. These sessions are **not** intended as equipment sales pitches! Because of the non-profit and neutral research status of OIRF we can look at, visit and hear from all kinds of different (sometimes even competitive) companies while the focus is on learning how these tools work, how they can apply in your practice and what their benefits are for your patients – all without an overwhelming commercial push. This then allows you the ability to make an informed and non-impulse purchase choice, always with the helpful guidance of OIRF staff and other attending directors/advisors.

The Tour is presented this year in our traditional 7-day format and coincides with the famous **Medicine Week Congress in Baden-Baden**, so that you minimize time away from your practice. Our program theme this year is **“Putting It All Together: A Comprehensive Overview of Effective Modalities in Biological Medicine”**. Be exposed to the very latest information and research on a broad range of Biological Medicine topics. Then you can see what is available and make an informed decision about how any of them can be applied in your daily practice. Full participation earns attendance certificate attesting to a minimum of 30 CEU hours. You can see full details concerning this [44th Germany Tour program](#) on our website by following this link.

Here’s a brief outline of our many planned activities, and our detailed itinerary will be published shortly.

Your Keynote Speaker for 2017 is: Manfred Doepp, MD is an internationally renowned nuclear physician as well as the founder and director of the DGEIM (Deutsche Gesellschaft für Energetische und Informations Medizin = German Society for Energetic and Information Medicine). He is regarded as a forerunner of Complementary Medicine. Currently he leads the *Quantisana Gesundheitszentrum* in Switzerland.

Dr. Doepp will speak to us about his ongoing research on the *“Rapid exponential increase in the blanket of electromagnetic frequencies in our environment”* and the *“Digital Clinic”*.

Here are some of the clinical lectures scheduled for our OIRF Tour #44 participants . . .

<p>Clinical Lectures: at Med-Week – One full day</p>	<p><i>Friedrich Douwes, MD,</i> Chairman Various other speakers</p>	<p>Integrative Cancer and Lyme Disease Specialist</p>	
<p>Clinical Lectures: at Med-Week – One half day</p>	<p><i>Uwe Reuter, MD and Ralf Oettmeier, MD</i></p>	<p>Biological Medicine specialists using multiple modalities</p>	
<p>Clinical Lecture: OIRF exclusive</p>	<p><i>Olaf Kuhnke, MD</i></p>	<p>Diagnostic and Therapeutic procedures and results, as well as newer therapies such as Laser IV Therapy</p>	
<p>Pharmacy Lecture: At Med-Week – One half day</p>	<p><i>Georg Stommel, MD and Siddhartha Popat, MD</i></p>	<p>RNA Therapy (Dyckerhoff Pharma)</p>	

Here are some of the instrumentation lectures and visits scheduled for our OIRF Tour #44 participants . . .

- **Alfa Thermodiagnosics**: Regulation Thermography – **Daniel Beilin, OMD, LAc**
- **ONDAMED**: Pulsed electromagnetic field therapy with biofeedback – **Silvia Binder, ND, PhD**
- **THERAGEM**: Fusion Light Therapy utilizing gemstones – **Catharina Jansma**
- **Med-Tronik**: BioResonance Therapy and Diagnostics – **Nuno Ruivo, DO and Peter Mahr, HP**
- **Advanced Medical Systems (AMS)**: Pulsed Electromagnetic Field Therapy – **Frank Beck, DSc**

As part of the tour, you will be in attendance for 2½+ days at the **49th Medicine Week Congress in Baden-Baden**. Attendance at this Congress should be on the “bucket list” of every practitioner involved in any type of Biological or Complementary Medicine. It is the largest gathering of its type, with up to 4,000 attendees (normally restricted to MDs) and 230 booths exhibiting the latest in cutting edge technology. Besides your scheduled lectures you should have plenty of time to roam the exhibits and halls. You will be given an introductory overview of the Medicine Week Congress and the exhibits so you can plan your “attack”. If you’ve never been to

Medicine Week, don’t pass up this opportunity. I do have to warn you however that once you have been to one, you will want to return – over and over again as so many of our OIRF Directors and Advisors do!

Why Should I Participate in the OIRF Germany Tour Program?

This tour package is an **inclusive custom-tailored guided educational tour for medical professionals**, so you are assured of like-minded companions who share your interest in biological and alternative medicine. Dates for this tour program are: Thursday, October 26 through Wednesday, November 1, 2017. Attendance for this year’s tour program is being strictly limited and we recommend early registration.

Our attention to the preplanning of all the minute details guarantees that this program will run smoothly and comfortably. Besides your personal single room accommodations, you will travel on a private motor coach, and you will be able to experience Germany on an intimate basis. The countryside is beautiful this time of year, especially once we reach the Black Forest.

Unlike many commercial sightseeing-type tours, on this tour you will **not** be abandoned and left to figure things out for yourself. We will not let you get “lost in the crowd” and we

will not request more money for added educational activities. We will make sure that your experience is personal, enjoyable and highly educational. There is always a great sense of adventure and comradery on these tours, and many long-term friendships have started here.

The restaurants and hotels that we visit are intimate, locally owned and run establishments, giving you a taste of true German hospitality. If you haven't experienced a full German breakfast, make sure to bring a belt that expands!

Pricewise this is the least expensive tour of its kind for only \$3,895 CDN / \$2,795 USA. While this fee does not include airfare, it does include all educational costs (such as speaker honorariums, entry fees and meeting room expenses), your ground transportation, hotel accommodations and all but a few meals.

Here are just a few more reasons to take care of that advance registration and get your airfare and travel arrangements in place . . .

<ul style="list-style-type: none">◆ High level, elite educational lectures◆ Cutting-edge, evidence based information◆ Networking with like-minded medical professionals◆ New protocols to integrate into your daily practice◆ Connections with experts in the field	<ul style="list-style-type: none">◆ Connections with representatives from multiple remedy, instrumentation, research and clinical organizations◆ CEU credits◆ Ability to expand your patient base and increase revenue stream◆ And – collect new remedy Test Sets!
---	--

Add to that our 43 previous tours' experience, and it equals one of the best educational tours you can ever hope to find. I'm looking forward to meeting you there (*personally, I wouldn't miss it, but then . . .*) Once again here's the [Germany Tour link](#) for full details and be sure to contact OIRF now to reserve your spot!

Yours in health,

Carolyn
